Fios® TV Rate Change

Fios TV Package Content Rate Increase

It is Verizon's priority and commitment to provide you with the best service and value in the industry. To continue to provide you with quality TV programming, on or after 60 days from the date of this bill, the base rate for your Fios TV plan will go up by $3-$9 per month. This increase helps cover a portion of the escalating annual costs many of the network providers charge to Verizon for their programming.

We offer many other options that can help you get the most for your money. You may even be eligible for a special offer. Go to verizon.com/myaccount to find the best value for you.

If you would like to keep your current service as is, no action is required and any credits or discounts remain in effect until their original expiration date. If you recently signed up for a new bundle agreement, please disregard this notice.
