% OF COUNTY RESIDENTS VACCINATED BY AGE

*The number of vaccinated may exceed the estimated population by age group due to margin of errors associated with population estimates and vaccine data entry issues. For these reasons, the CDC caps percentages at 99.9%.

Percentage of 12-17 year olds vaccinated reported as 90% confidence range because of higher margin of error. In this age group, 83,400 have received their first dose and 73,282 have received their second dose as of 10.31.2021.

*While cases are decreasing, the number of cases each week are subject to change due to lags in data.

RATES PER 100,000 BY AGE GROUP

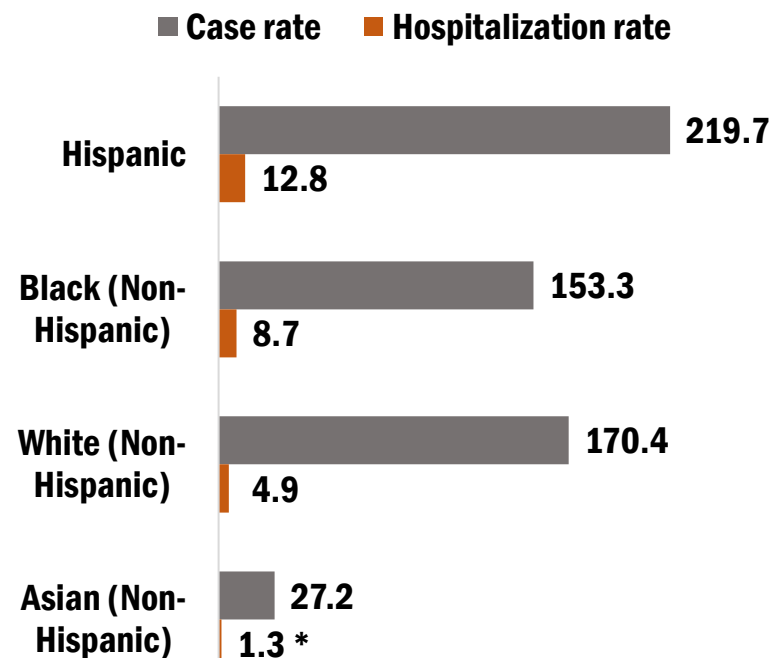

The highest rate and number of cases over the last 4 weeks has been within the 0-9 age group. The senior population continues to experience the highest hospitalization rates.

Case rate is calculated for the four-week period noted above.
* Data points marked with an asterisk should be interpreted with caution due to count per category <10.

RATES PER 100,000 BY RACE/ETHNICITY

Hispanic and Black (non-Hispanic) continue to experience the highest hospitalization rates, despite vaccination rates that are close to or exceed the White population. (See slide 14.)

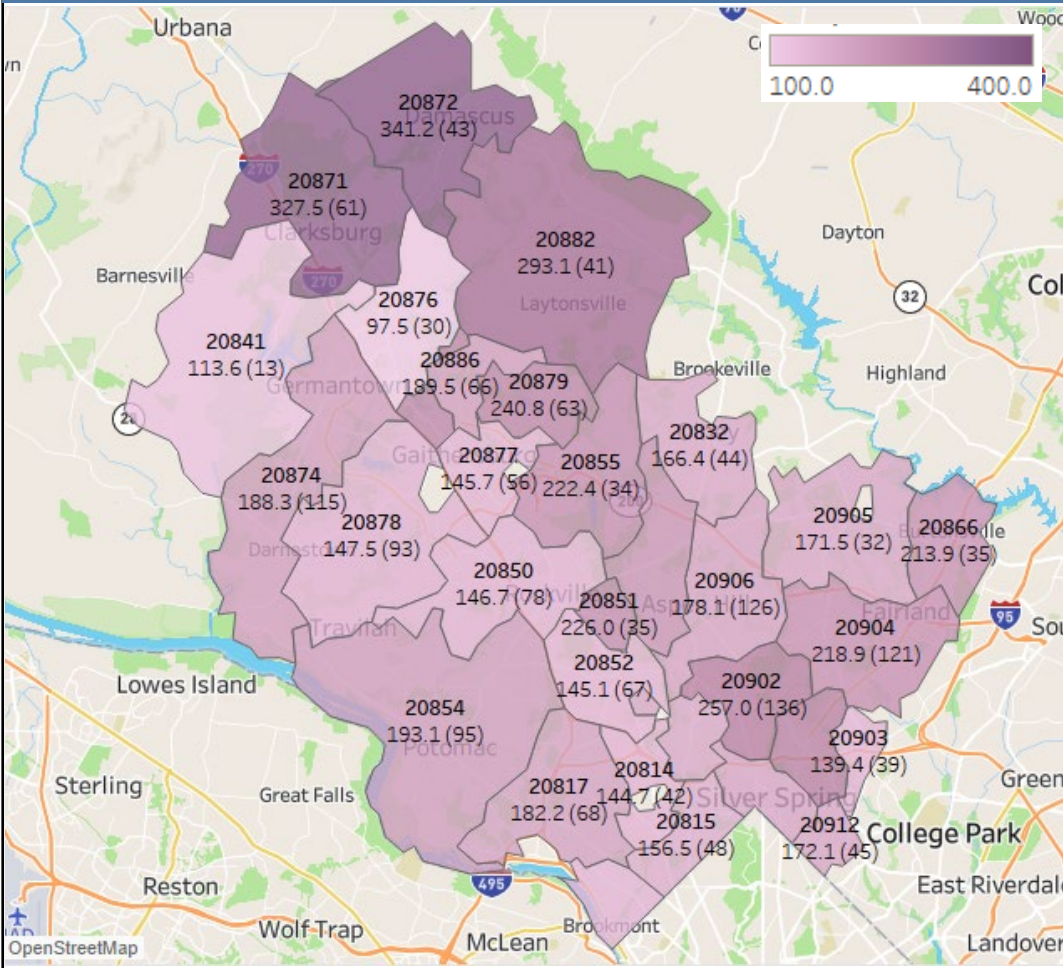

Note: Data on race and ethnicity is not always collected. In the past 4 weeks, 16% of cases were entered as "Other" and 5% were "Unknown."

Case rate is calculated for the four-week period noted above.
* Data points marked with an asterisk should be interpreted with caution due to count per category <10.

COVID-19 CASES AND HOSPITALIZATIONS: LAST FOUR WEEKS (10.4 to 10.31)

CASES PER 100,000 BY ZIP CODE

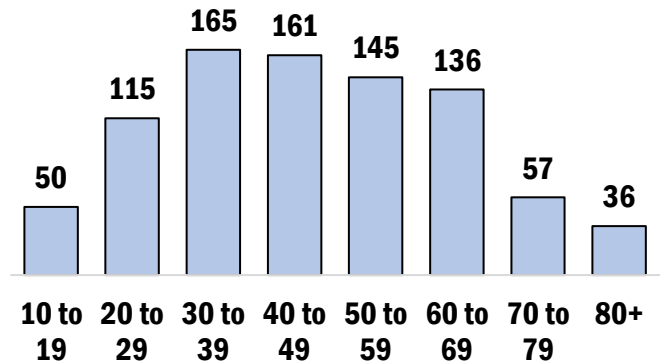

Case rate is calculated for the four-week period noted above. Number of cases are noted in parentheses.
 Excludes zip codes with populations under 10,000.
 Note: Not all case data include zip code information.

BREAKTHROUGH CASES & HOSPITALIZATIONS

4-WEEK TOTAL BREAKTHROUGH CASES	867
4-WEEK TOTAL BREAKTHROUGH HOSPITALIZATIONS	30

Breakthrough Cases by Age Group

*Age unknown for 2 cases.

CASES & HOSPITALIZATIONS BY VACCINATION STATUS

Vaccinations, Cases, and Hospitalizations Among Population Ages 10 & Older

Population ages 10 and older serves as a proxy for the county's vaccine-eligible population (ages 12+ as of publication of this report) to match case and hospitalization data, which are reported by age groupings 0-9, 10-19, etc.

Calculations are based on cases and hospitalizations in the four-week period noted above.
