COVID-19 CASES, VACCINATIONS, & TESTING

COVID-19 CASES & POSITIVITY RATE

Case rate fell below 100 per 100k for the first time since December 15.

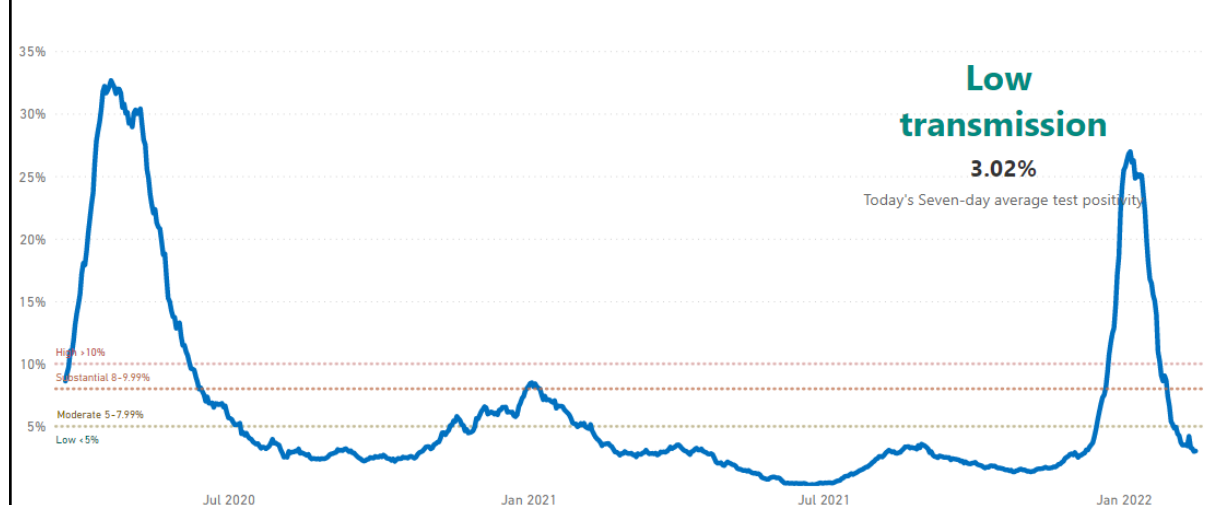

CASES AS OF 2/15/22*

Number of cases per 100,000 persons in the past seven days

POSITIVITY RATE AS OF 2/14/22

Seven-day average percentage of tests administered resulting in a positive case

*Cases may be underreported to some extent due to the increased use of self-test home kits.

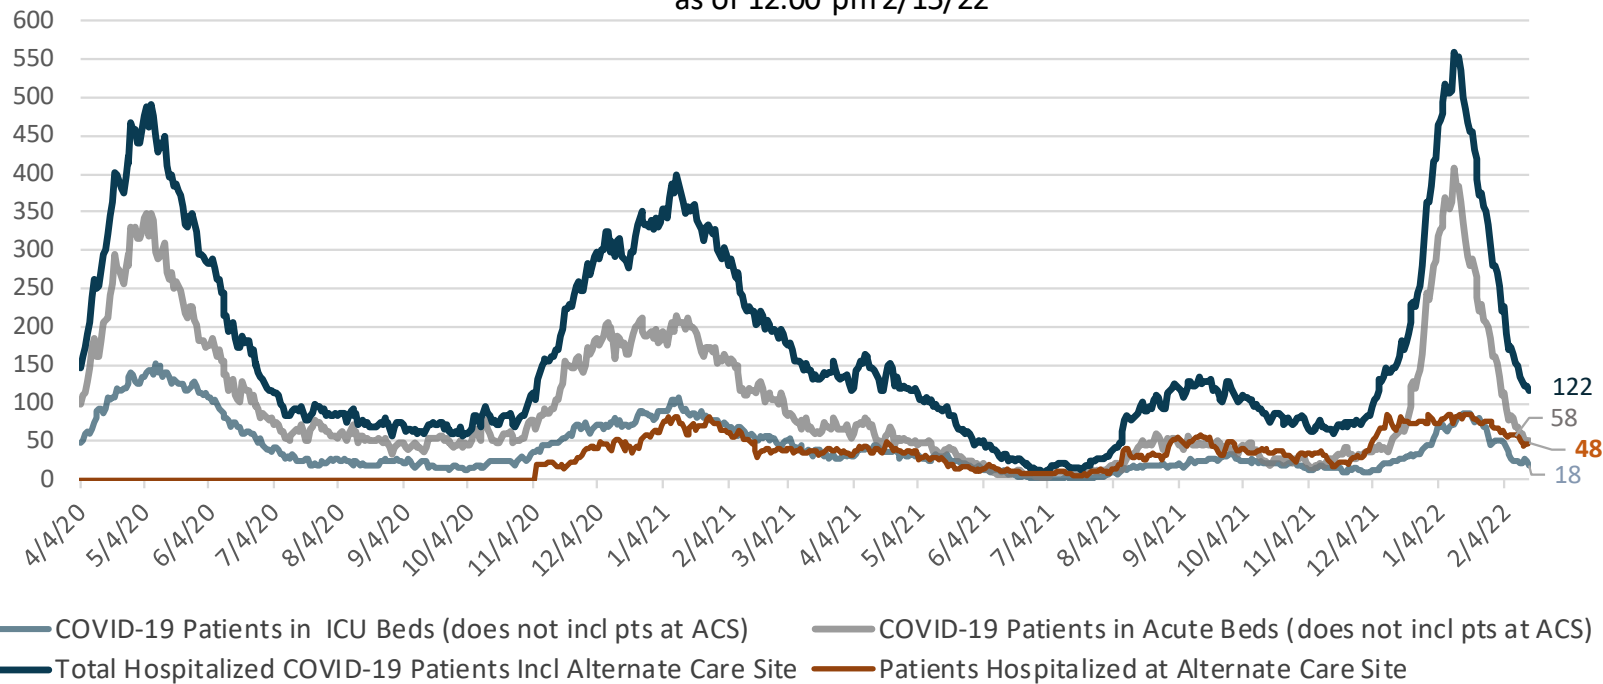

NOTE: The MDH security incident disrupted prior reporting on cases and hospitalizations *by vaccination status*. Reporting will resume once access to that database has been restored.

COVID-19 HOSPITALIZATIONS

Total ICU and Acute Beds Occupied by COVID-19 Positive Patients

(Montgomery County Hospitals and the WAH Alternate Care Site)
as of 12:00 pm 2/15/22

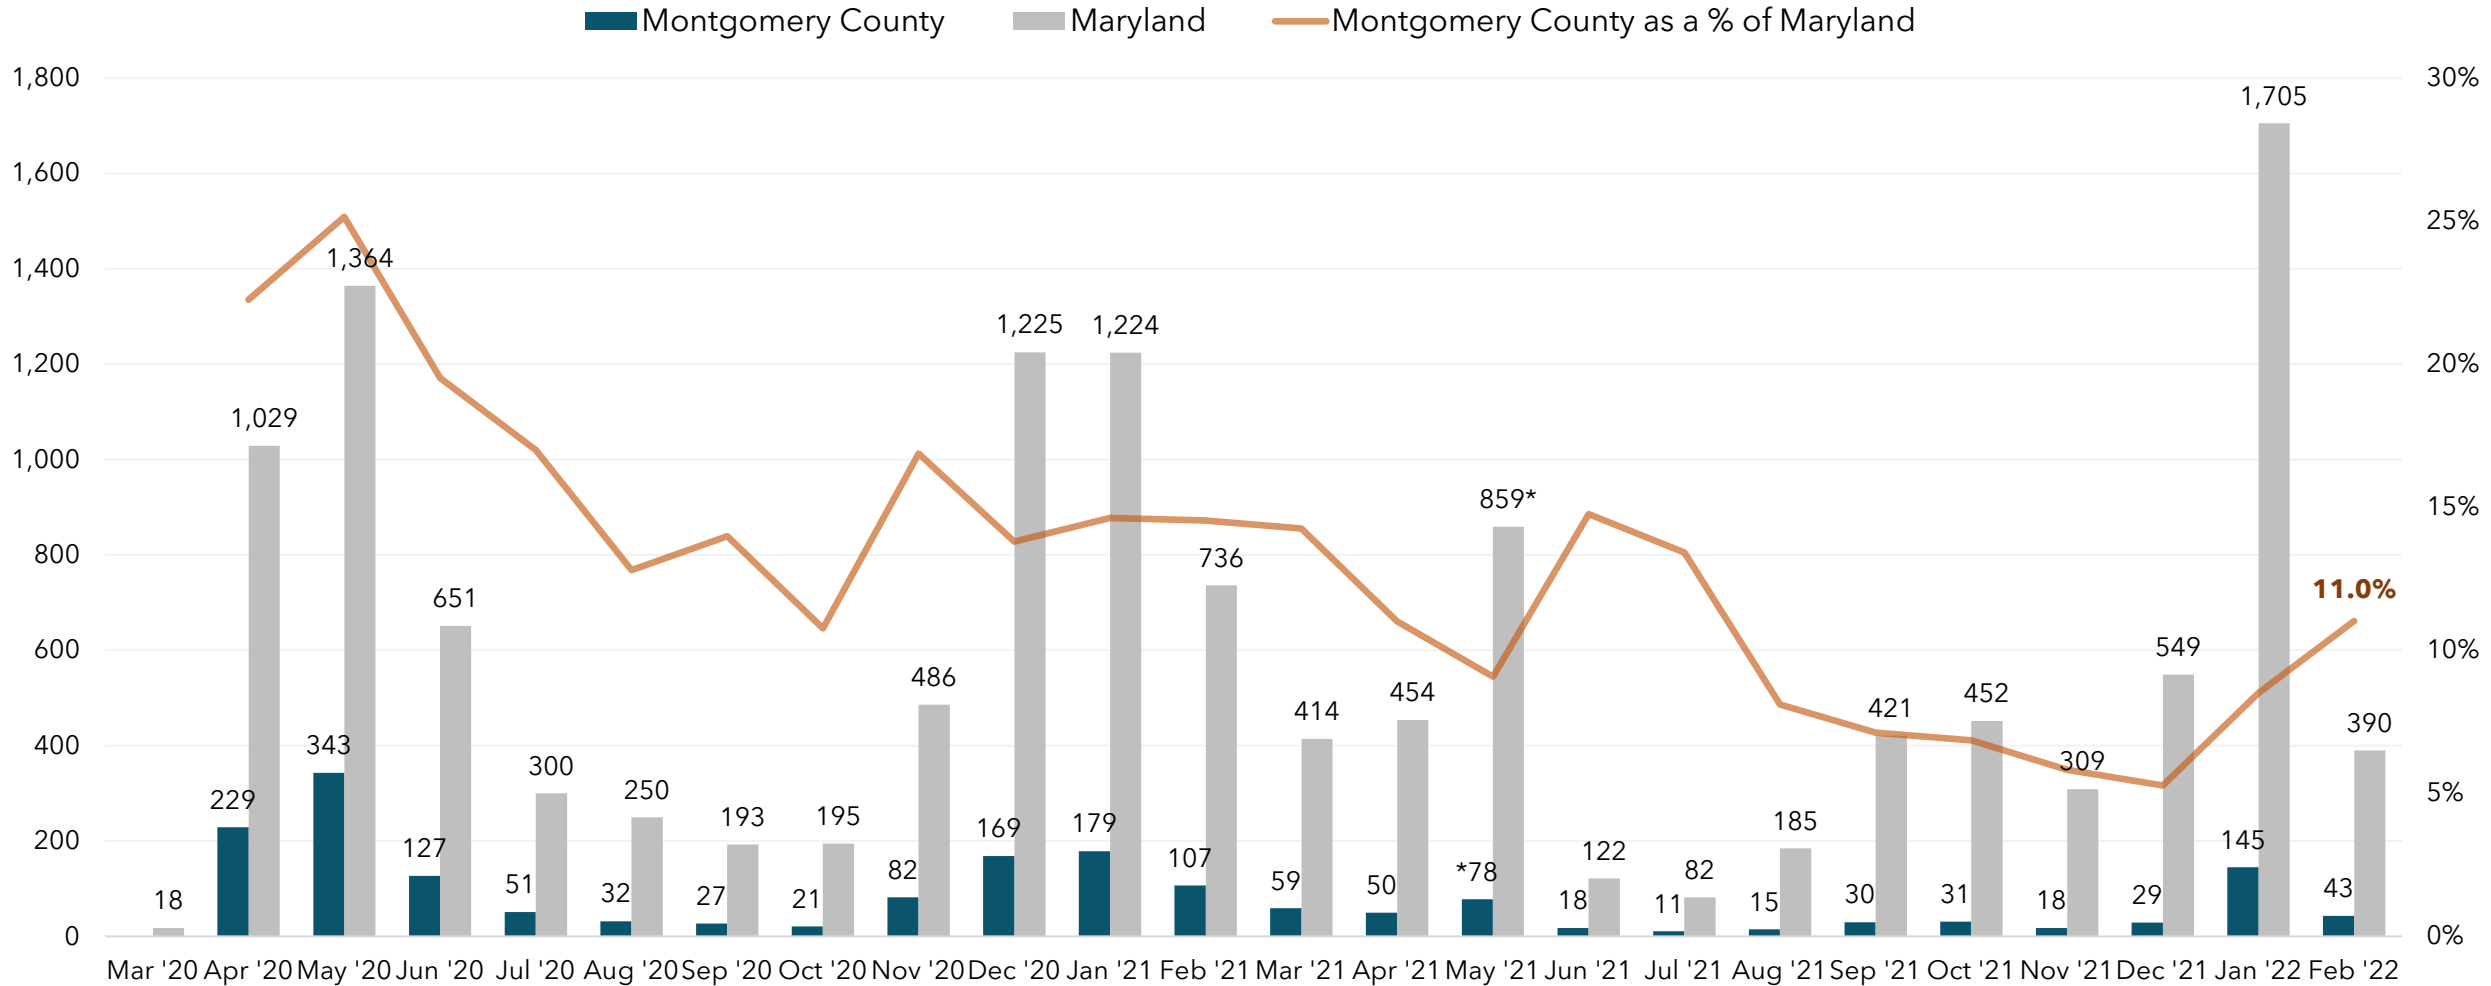

- There are 122 hospitalized COVID-19 patients as of 2/15/22. Both acute care and ICU bed usage has declined.
- 7.2% of hospital beds in the community are occupied by patients with a COVID diagnosis.
- 48 patients are currently hospitalized at the alternate care site. These patients are transfers from other hospitals and may come from other jurisdictions.

COVID-19 DEATHS

Monthly COVID-19 Deaths

Updated 2/14/22

*VSA revised death data on May 27, 2021 to include COVID-19 deaths not previously counted.

COVID-19 VACCINATIONS: TOTALS FROM CDC

TOTAL VACCINATIONS (AS OF 2/14/22)

- **≥95%¹** of total population received at least **ONE DOSE** [N=1,048,558]
- **85%²** of total population received at least **TWO DOSES** (fully vaccinated) [N=890,408]
- **52%** of fully vaccinated population received a **BOOSTER/ADDITIONAL DOSE** [N=458,352]

1. The CDC caps percentages at 95% to account for margins of error in data entry and population estimates.
2. On 1/19 the CDC revised its method for counting vaccines administered at Bureau of Prisons and at Department of Defense facilities to better align vaccine counts with residential county of recipient instead of county where vaccine was administered. This revision has decreased the vaccine county for Montgomery County.

NOTE: The CDC vaccination count includes Montgomery County residents who received their shots in Maryland or outside the state. It also includes vaccinations administered in some federal entities within Montgomery County.

VACCINATIONS BY AGE GROUP

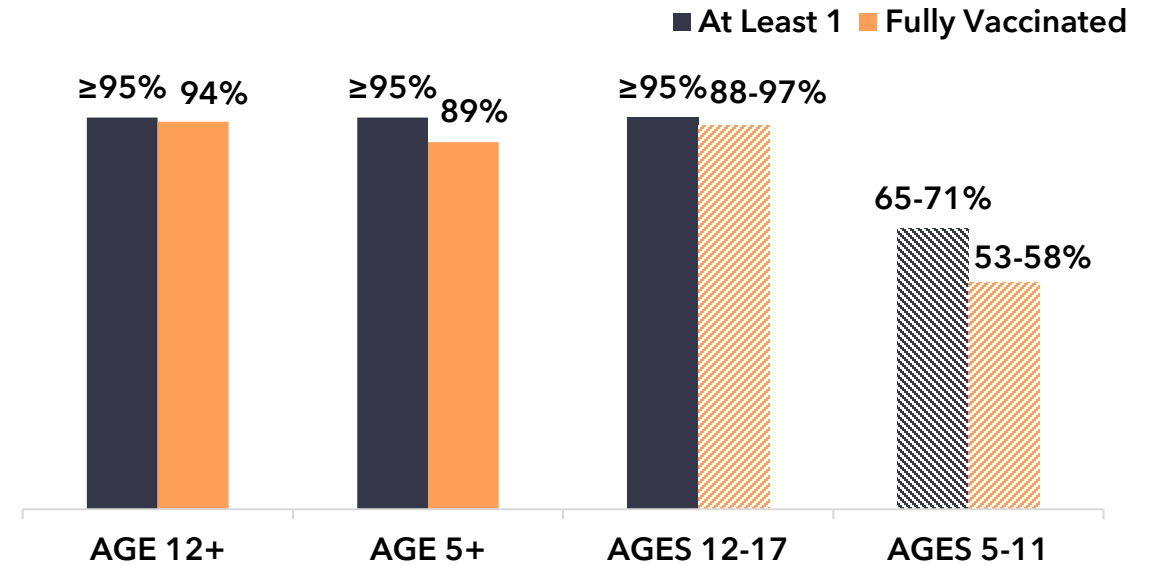

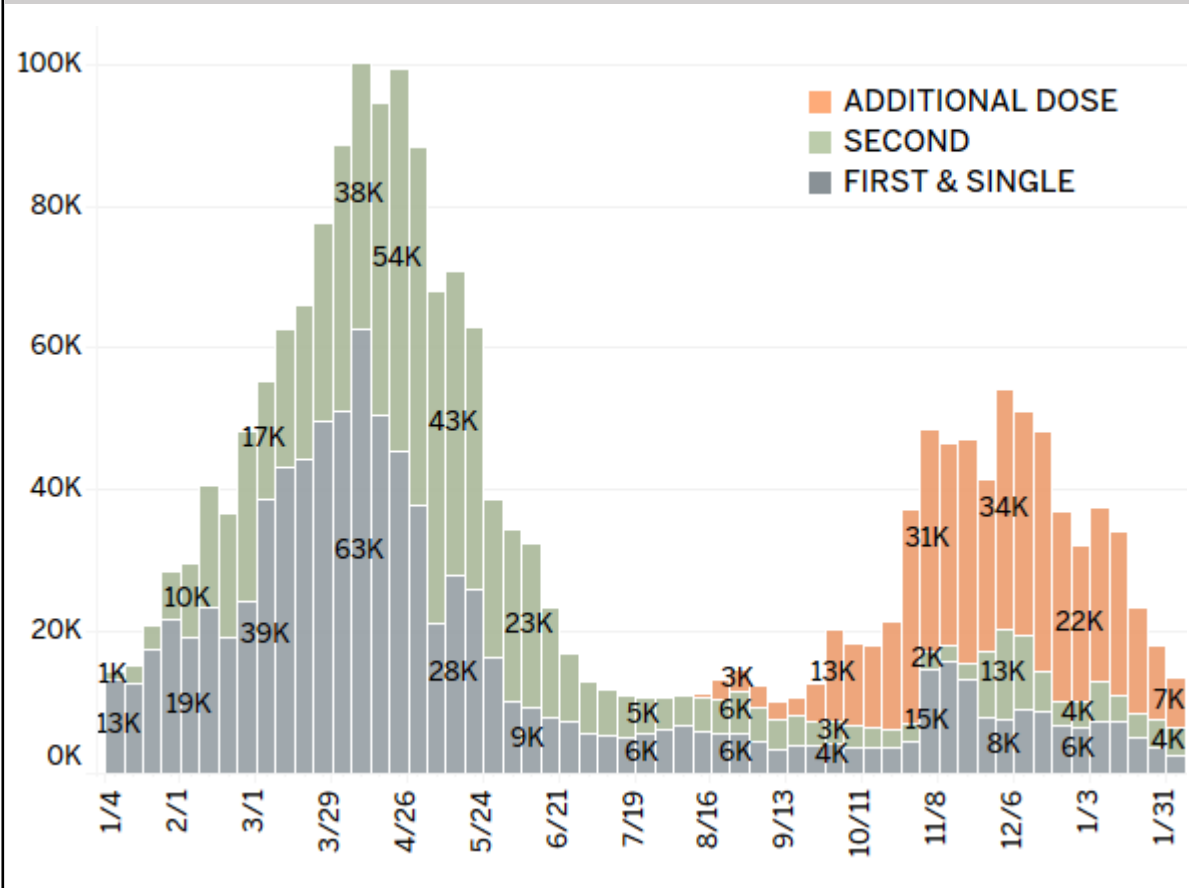

Chart reflects percent of total age group population that received doses. Percentage estimates are reflected as ranges for ages 12-17 and ages 5-11 due to higher margins of error.

- **57%** of the fully vaccinated 18+ population received a **BOOSTER/ADDITIONAL DOSE** [N=431,345]
- **75%** of the fully vaccinated 65+ population received a **BOOSTER/ADDITIONAL DOSE** [N=123,437]

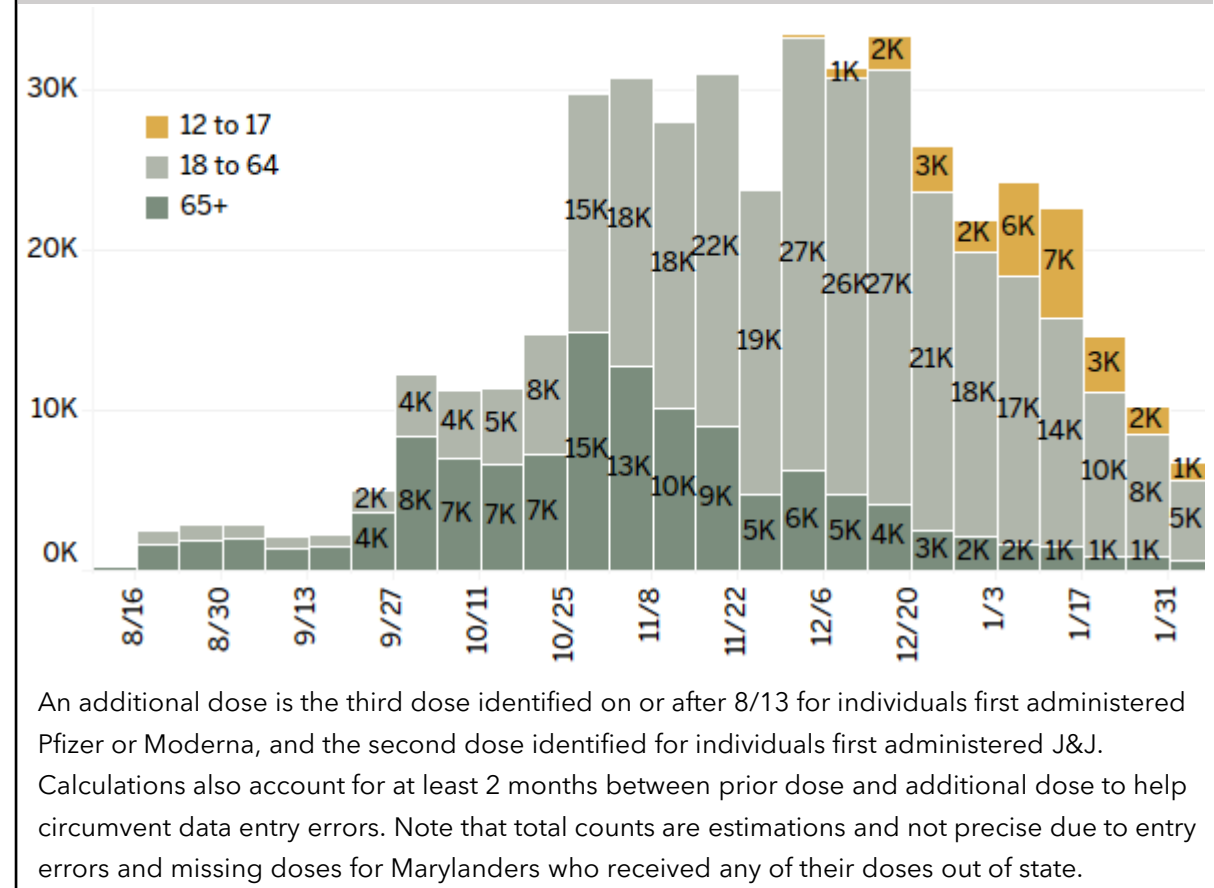

COVID-19 VACCINATIONS: FIRST-DOSE WEEKLY VOLUME

Charts below show most recent full weeks of data, up to **February 6, 2022**.

VACCINATIONS BY TYPE

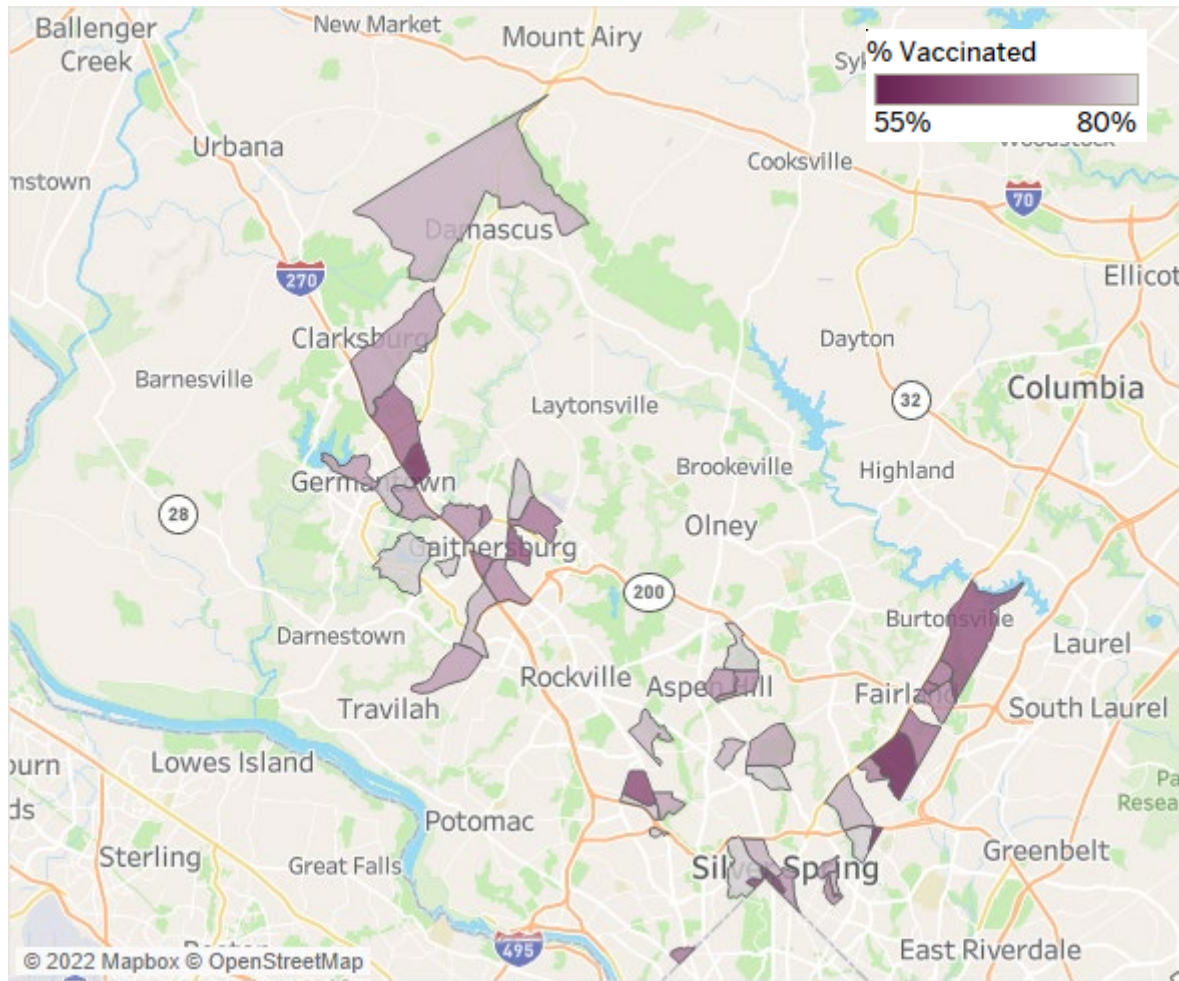

ADDITIONAL DOSES BY AGE GROUP

Unlike the CDC vaccination data, data from Maryland Health Department only include Montgomery County residents who were vaccinated in Maryland. Totals do not include vaccinations administered at federal entities within the county to non-residents.
