

DENNIS AVENUE Stormwater Controls

PUBLIC MEETING

Wed Feb 8th

7:00 – 8:00 PM

Sligo Middle School

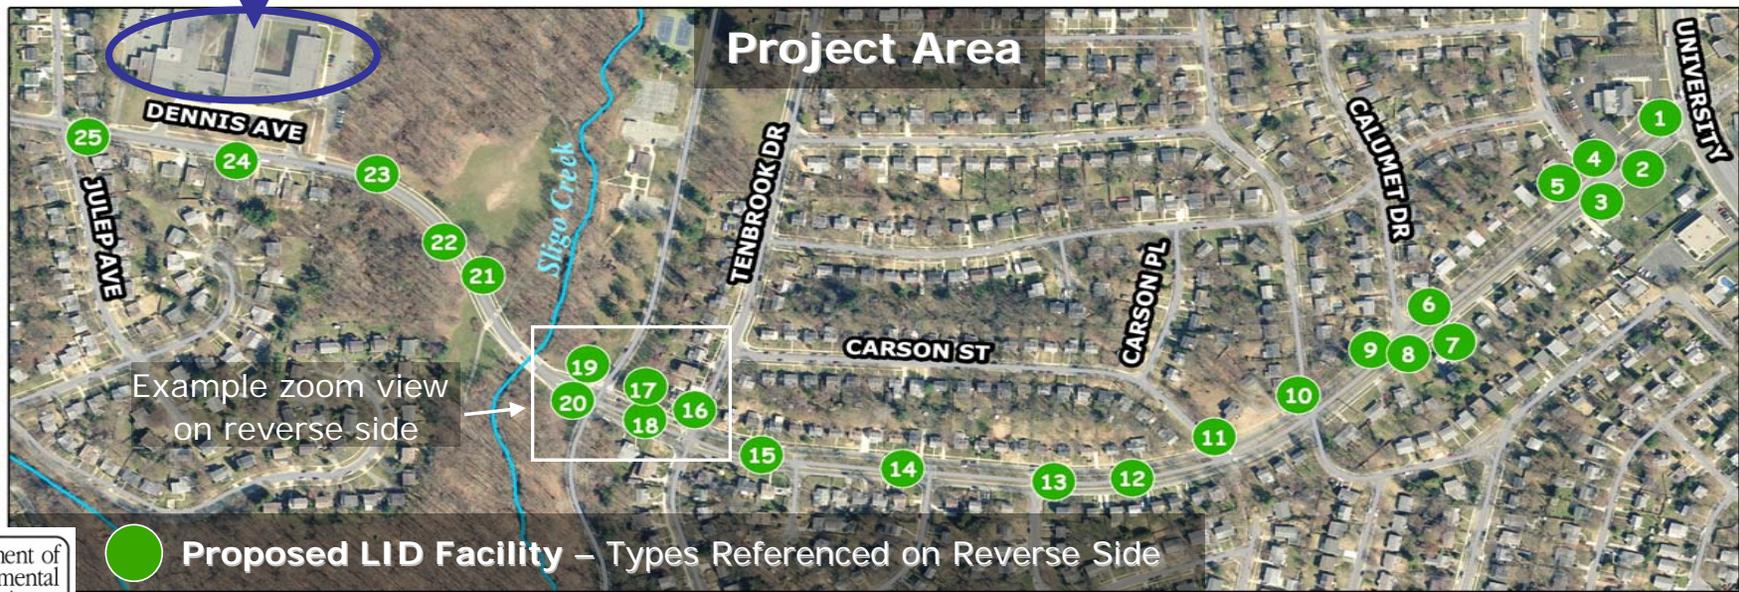

Cafeteria

1401 Dennis Ave

Montgomery County's Department of Environmental Protection (DEP) and Department of Transportation (DOT) are completing designs for small-scale stormwater management facilities known as Low Impact Development (LID) along Dennis Avenue.

This project is part of the County's need to meet Federal and State mandates to control and treat stormwater runoff. The goal of this project is to reduce stormwater runoff, minimize pollution, promote infiltration, and restore stream conditions in Sligo Creek, the Anacostia River, and the Chesapeake Bay.

The facilities will be located within the right-of-way. Most projects will be constructed within the street, but some will be located within the grassy planter strip between the curb and sidewalk. All project landscaping will be maintained by DEP and DOT.

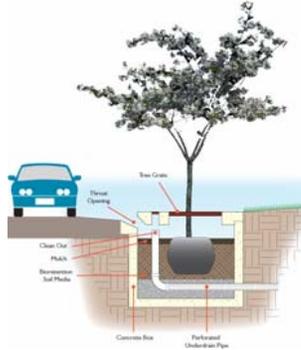

For more information, contact Mark Wilcox at 240-777-7768,
email: mark.wilcox@montgomerycountymd.gov
or visit our website at www.montgomerycountymd.gov/dep

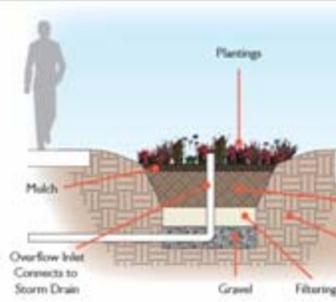

Estimated Start of Construction: Late Feb 2012
Construction Hours: 9am – 3pm

DENNIS AVENUE LID (Low Impact Development) Examples:

Tree Box

Bioretention

Step Pool Storm Conveyance

Swale Curb Extension

Example Zoom – Facilities 16 - 20

#	TYPE	#	TYPE
1	Tree Box	14	Bioretention
2	Tree Box	15	Bioretention
