*Rain or
Shine*

Thurs, Aug 8th

6:00 – 8:00 pm

Start at Lanark Way & Portland Rd

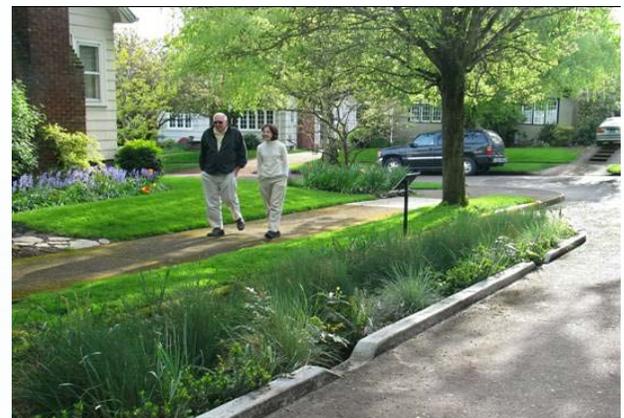

See map on
reverse side for
project phases
& more details

About the Walk

Join the Montgomery County Departments of Environmental Protection and Transportation on a **Community Walk** to learn about the Green Street proposed near Dennis Avenue that drains to Sligo Creek.

Green Streets are roadway Low Impact Development (LID) designs that reduce and filter rainfall and pollutants that wash off surface areas (stormwater runoff) and may include rain gardens, bioretention gardens, curb extensions, bioswales, tree box filters, permeable parking pads, and pavement removals.

See reverse side of flyer for more details on the Phase 3 Community Walk and Green Street locations.

Bioswale/ Swale Curb Extension (Example)

What You Can Do to Help!

Through the County's RainScapes Rebate program, Dennis Avenue residents also have the option to install rain gardens, rain barrels, and other runoff control features on their property, and have costs partially rebated by the County. See www.rainscapes.org for more details.

Tree Box Filters (Example)
