DESCRIPTION

This project provides for design and reconstruction of existing Randolph Road, which is a major east/west arterial road, from Rock Creek to Charles Road for a total length of approximately 1,500 feet. Included in the project limits are three intersections: at Dewey Road, Saint Dunston Lane, and Colin Road. Improvements include increasing the radius of the existing roadway from 260 feet to 535 feet, increasing the length of left turning lanes at Dewey Road, and providing ADA compatible sidewalks, crossings, and ramps.

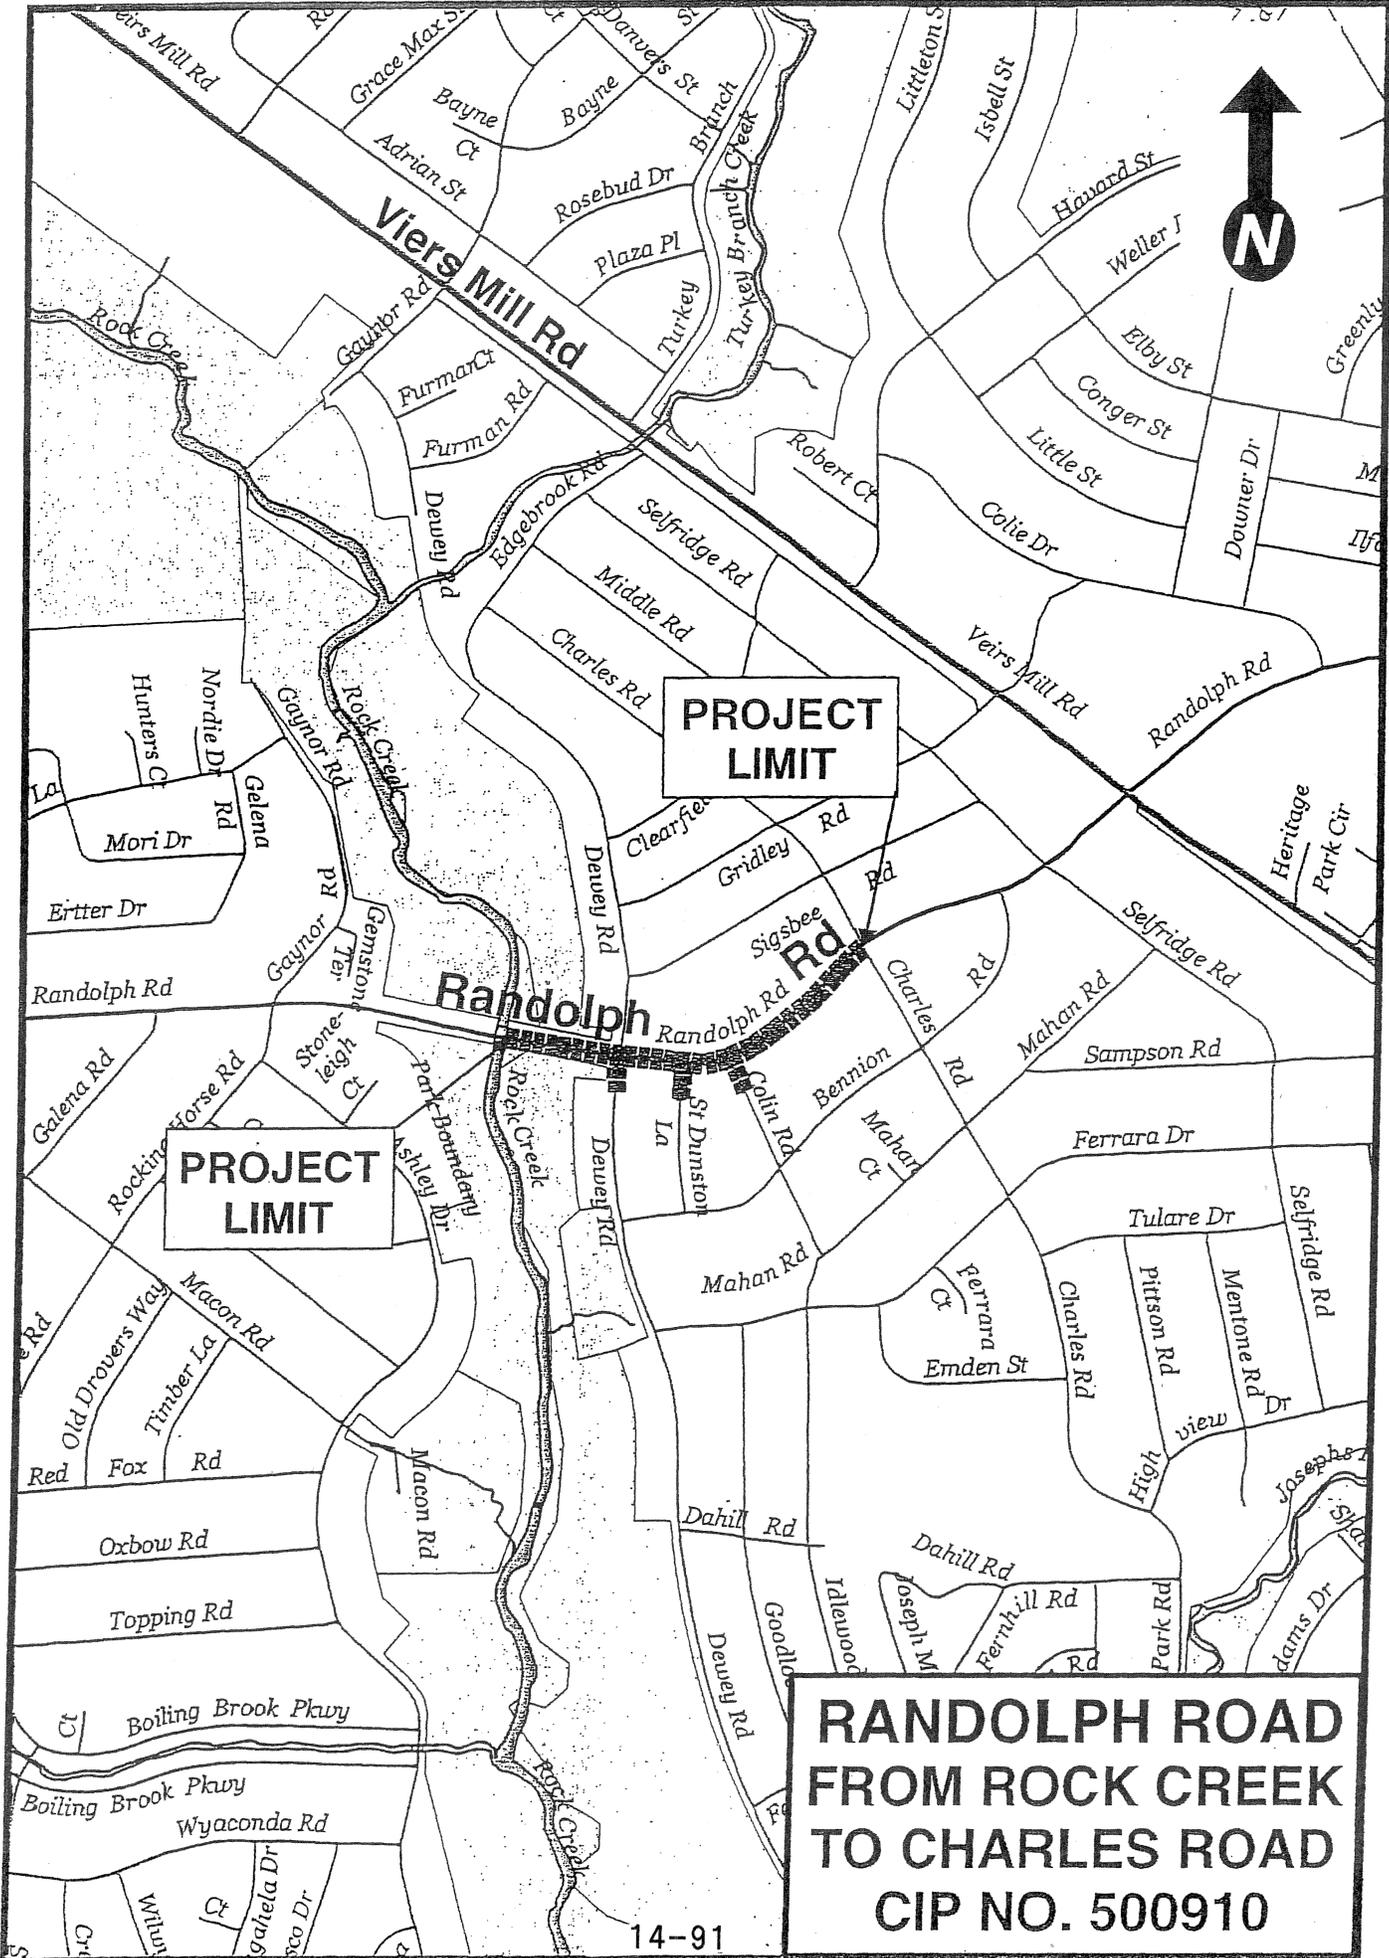

JUSTIFICATION

Studies conducted by the Traffic Engineering/Operations Division of the Department of Transportation (DOT) indicate that traffic accident rates are significantly higher than state average in this section of Randolph Road. The studies also identified congestion at the intersection of Dewey Road and recommends lengthening the existing left turning lanes. Pedestrian safety improvements at Dewey Road will provide safe crossing of Randolph Road and access to Rock Creek Park.

OTHER DISCLOSURES

- A pedestrian impact analysis has been completed for this project.
