DESCRIPTION

This project provides for modernizing the fire station alerting system at 32 existing stations, maintaining the ability to notify fire and rescue stations of emergencies. The alerting system, including audible and data signals, is essential for the notification of an emergency and the dispatch of appropriate response units from the county. The final design and installation will accommodate varying conditions from station to station. Some of the components of the current system are old and cannot be replaced. If a system breaks down, there might not be a reliable method of dispatching fire and rescue apparatus to emergency incidents.

JUSTIFICATION

Identified as a need under Section 5 of the MCFRS Master Plan, as adopted by the County Council in October 2005, and detailed in the Station Alerting and Public Address (SA/PA) System for Fire/Rescue Stations, Rev 1, 2006, this project allows for the continuous and seamless functioning of the alerting systems within each fire station. A preliminary survey by DTS of existing conditions at all stations revealed systemwide concerns, including inadequate spare parts inventory and lack of available maintenance support for alerting systems.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY10	(\$000)
First Cost Estimate	FY10	3,840
Current Scope		
Last FY's Cost Estimate		0
Appropriation Request	FY10	500
Supplemental Appropriation Request		0
Transfer		0
Cumulative Appropriation		0
