Construction Ahead

APRIL 2014

Montgomery County Department of Transportation

Division of
Transportation Engineering

GLEN ROAD OVER BRIDGE M-0148

Introduction

The purpose of this newsletter is to notify you of the upcoming project and to inform you of the project schedule, lane closures, and impacts to traffic and pedestrian access.

The Montgomery County Department of Transportation (MCDOT) Division of Transportation Engineering (DTE) will soon commence activities for the construction of the enhancement of the bridge deck on Glen Road over Bridge M-0148.

Project Scope and Design

This project encompasses construction work for the enhancement of the bridge deck on bridge M-0148. A temporary bridge deck will be overlaid so as to strengthen the existing bridge and allow heavy traffic to travel along Glen Road.

Work Hours, Schedule and Inspection

Signs have been posted since April 18, 2014. The work is to start on or about Friday, May 2, 2014 and is expected to be completed on or about Wednesday, May 7, 2014. Work will be performed under complete road closures and vehicular traffic will be detoured to alternate routes during construction.

Construction is scheduled to take approximately three-to-four days to complete. Throughout the construction process, a full-time County representative will be present on the job site during the hours of construction to oversee the construction progress, monitor the work zone for pedestrian and traffic safety and to answer questions that you may have about the project.

Special points of interest:

- Construction will begin on or about May 2, 2014.
- The project is expected to take 3-to-4 days to complete.
- Road closures will occur throughout the duration of this project.

Pedestrian Access, Traffic Control Plan and Phasing

Accessible pedestrian routes will be provided and maintained to the maximum extent feasible throughout the project's limits. When an existing pedestrian access route within the public right-of-way is blocked by construction, or maintenance activities, an alternate accessible pedestrian route will be provided.

Access to all side streets and driveways will be maintained at all times. Signs will be posted for safety.

Division of Transportation Engineering

The Division of Transportation Engineering provides project planning, engineering design, and construction management services for the County's roads, bridges, sidewalks, and bikeways.

Impacts to County Services

Montgomery County strives to minimize the impact construction projects have on residents, businesses and motorists. A Traffic Control Plan has been developed to permit safe passage for vehicular, bicyclists and pedestrian traffic during construction activities. You may experience some construction noise and dust during regular work hours. The noise and dust levels will be closely monitored by the project inspector.

All basic public services such as mail delivery, etc., will continue to be provided without impacts.

Keeping Informed

This newsletter is sent to residents who are on the project mailing list and to the owners of businesses in the vicinity. Please share this information with your neighbors.

Project Management Team

A staff of dedicated professionals will oversee the construction and insure that the project is completed safely, timely, on-budget and in compliance with the specifications. In addition, the team members are available to answer any questions you may have.

Feel free to contact any member of the Project Team.
