The Maryland Department of Transportation, in partnership with the Montgomery County Department of Transportation, completed a Corridor Study to evaluate alternatives for Bus Rapid Transit (BRT) along MD 586 (Veirs Mill Road), as shown on the map to the right. The Study Report is available for public review and comment at: montgomerycountymd.gov/brt/. A Public Meeting will be held to provide information and gather public comment on the evaluation of alternatives for BRT service between Wheaton and Rockville. At the Public Meeting, you will be able to review the results of the alternatives comparison, including:

- Detailed plans of each alternative
- Transit and traffic operations
- Environmental impacts
- Cost estimates

Representatives from the Maryland Department of Transportation and Montgomery County Department of Transportation will be available to answer project-related questions and receive comments.

What is BRT?

BRT stands for Bus Rapid Transit, a modern, flexible, lower cost, premium form of transportation that combines features of both a bus system and a light rail system. BRT features can include:

- Dedicated lanes, which means less traffic congestion for riders
- Green light priority signaling allowing for shorter travel times
- Multiple doors and low floor vehicles, which result in quick, easy and efficient entry and exiting
- Pay stations to pay for the fares before boarding, which allows for faster boarding
- Vehicles with rubber tires which allow them to divert from the transitway
- Upgraded, modern stations

Your comments and suggestions are very important to us!

Project information can be found at montgomerycountymd.gov/brt/. We encourage you to submit questions or comments to md586brt@sha.state.md.us or by mail to Laura Barcena, Consultant Project Manager, Maryland State Highway Administration, 707 N. Calvert Street, Mail Stop C-301, Baltimore, MD 21202.
