The Business Solutions Group (BSG), in the Office of the County Executive, focuses on assisting companies doing business in, or with, Montgomery County Government. The group includes the small business navigator and business liaison officers who help businesses understand County processes and the laws that impact them. The BSG manages the award-winning Montgomery County Business Portal, a gateway to information on how Montgomery County interacts with the business community, and the Business Connect Program that offers classes, counseling and connections to County business resources. Businesses will also find a calendar of trainings and workshops offered by local resource partners designed to help them start, grow and thrive in Montgomery County.
