

On behalf of myself and my team members of Ted's Montana Grill in Downtown Crown, we urge that you do not vote to decrease our capacity. We are all already struggling with the current restrictions and climate. Our sales have taken a huge hit and this affects our working staff and our entire establishment. We are extremely diligent in following all precautions and protocols currently in place. I believe this new mandate would deal us a serious blow for our entire team at Ted's Montana Grill. Apart from us at Teds Montana Grill, the entire restaurant industry in montgomery county would suffer a big financial loss from this, one that could take months to rebuild. The federal government also refuses to come to a consensus on stimulus for the people and business resulting in no aid from either the federal government or state and local governments. re-closing the county will be too harmful for the people and it is something the county needs to consider.
