

As someone who has played within our county ice rinks and the mshl, I can confidently say ice rinks should not be open. Hockey simply cannot be played in a safe manner at this time. The way the sport is designed makes it the highest risk possible, and along with the culture of the sport many players and even coaches have not been directly following guidelines. There was an outbreak on my team and the players even began to tell other players not to get tested anymore, so that in case one of us did have it we wouldn't get shut down. Until a vaccine can be provided to the masses hockey should be closed, as much as I love to play I know its doing nothing but harm in the long run.
