

March 25, 2021

As a parent of a soccer player, it is clear to me that the science supports masked, distanced spectators at these youth games. They are outdoors, there is no great deal of interaction, and at this point we should all be trusted to keep our space and keep each other safe.

The positive energy that these games produce will be helpful for parents and peers alike. We have all lost so much in the last year, we need something to cheer for!

And if businesses and schools and restaurants are all opening safely INDOORS, there is no reason outdoor spectators shouldn't be allowed to watch these kids play. SO MUCH better than watching another hour of screens!

Sincerely,

Julianne Weiner

Northwest High School Parent
