

Please let us support our children while on their playing fields. It means the world for most athletes to share in the experience with their families. Game 1-We were asked to leave a school campus while watching a live feed from the parking lot, while sitting inside our car. We had to move to a nearby shopping center. Majority of the time we were unable to see the game because the camera did not follow the ball. The second game, different location, the camera was broke and we could not see half the field. The look on my freshman's face both times when I told him we could barely see him and his teammates play was heartbreaking. Please LET US WATCH!!
