

Testimony of Jonathan G. Harris

From the most recent dashboard, it appears the county has crossed the 50% threshold for the first dose. Also, having checked on the website of CVS I have found both during late Saturday afternoon April 24 and Monday morning, April 26, vaccination slots are available in multiple locations in Montgomery County. Figure 1 shows availability as of 5:30 on 4/26/2021 at four CVS locations. I thus urge the council to commit to relaxing any local limits on occupancy or event sizes that go beyond normal limits or state restrictions within the next month. This should allow time for vaccinated people to develop immunity and receive second shots.

Hopefully, if current trends will continue, the thresholds triggering these changes will be hit regardless. In the event they are not, it is because individuals have chosen not to protect themselves via vaccination. While we should continue measures to vaccinate such individuals, it would be an unreasonable burden to deny others business and social opportunities.
