

Dear Council Members,

I would like clarification that if an indoor mask mandate is activated will restaurants and bars that depend on revenue from live music performance be allowed to continue live music and will singers be required to wear masks. Please understand that if the answer is yes you are effectively shutting down many businesses in the early evening and nights that music is offered. This puts these restaurants at a competitive disadvantage.

Will the indoor mask mandate, if enacted apply to indoor sporting events, swimming pools, cigar and hookah lounges?

Thank you for clarification on these points.

Sincerely,

Eric Heckman
