

It has been two years since the COVID pandemic began. I am weary of masks, and I am not alone. The Montgomery County government has continually changed its mind about masks as an incentive to get vaccinated. You have achieved the goal you set. You can't protect everyone and certainly you know this. You are shaming people who support freedom to choose by putting ridiculous mandates in place. The government is not responsible for my health or the health of the rest of the public. COVID is never going away, like the flu and the common cold. End the mask mandate and let people choose for themselves.
