

To whom it may concern:

Hello, my name is Michelle Vidals, I am a patient here at CRI. My experience with them is that they are helpful, caring and they are concerned about my well being and health. My first impression of Dr. Peralta was understanding and spoke to me in English although I'm bilingual in both Spanish and English. I prefer speaking English which is helpful. She spoke to me and asked me about my health and was understanding when other doctors did not understand what was going on with my body. I recommend everyone to her because of how understanding she can be.

Sincerely,

*Michelle Vidals*
