Dear Council Members,

As a lifelong resident of Montgomery County, I write to you with a request. I ask the Council to please approve the funding for a new mobile pediatric clinic, through Casa Ruben, Inc.

This much needed mobile medical clinic will allow children and young adults who are either uninsured, under- insured or without transportation to access primary healthcare services.

These children and young adults will benefit greatly by receiving vaccinations to allow them to enroll in school, health evaluation and other services from this cost effective mobile clinic.

Our community must be able to reach these residents and provide these basic services and critical care, and no better way to do so than with this mobile clinic.

Sincerely,
Lauren Sachs
