

What makes Dra. Ligia Peralta so special?

So one day my mom tells me that there was a female doctor at the clinic that she was going to change me from provider so that I would feel more comfortable and that I can talk to her about anything that I wanted. This made me feel more comfortable. So the day of my appointment I was nervous and didn't know how to act or approach her. So Dra. Peralta came up to me and introduced herself to me. This took a load off from me.

I went into the exam room with her and sat down to talk to her. My mom, my sister and my brother were waiting on me in the waiting area. She made me feel so relaxed and comfortable. I was telling her about my menstrual cycle and how irregular it was. So she told me not to worry about it, that she was going to find out what was wrong with me. At that moment my mom came in and Dr. Peralta told my mom that she had an idea of what was wrong with me but first she needed to run some blood work to make sure that she was giving us the right diagnosis.

So a few days later Dra. Peralta called my mom to schedule a follow up appointment with us to discuss the results from the blood work. This made my mother and me think of how special Dra. Peralta is. Today you would not find a doctor that can take such good care of their patients, put a smile on my face and give me hope. I had the best experience ever with Dra Peralta. If I ever have any questions or concerns I would text or call her. And the best thing is that she would reply to me quickly and on the same day. Dra. Peralta would speak and coordinate my care with the rest of the medical team that is taking care of me and that are looking out for my best interest.

This and many other reasons is what makes Dra Peralta such a special doctor. It takes a special person like her to take such good care of all of us. Thank you Dra. Thank you for being there when I have needed you the most.
