

Please do not decrease the budget for our Parks!

Montgomery county has a legacy of great parks and facilities. This was most evident as we needed to rely on our outdoor safe spaces during COVID restrictions. Having safe places to walk and bike and play helped relieve some of the stress of each day. Montgomery Parks continues to improve accessibility by adding communication boards, ramps, a canoe/kayak loading ramp, and other modifications so that EVERYONE can enjoy our green spaces. The county continues to add new programs to reach all citizens like Gardening for People with Disabilities. Please do not decrease funding for our vital green spaces and amenities.
