To whom it may concern:

This document is to provide testimony for the Clarksburg Library to be located in Town Center as promised. The following are points in support of this request.

- Town Center residents are most affected by the library relocation and should have a more significant voice in this decision than what we have been given to date.
- The Clarksburg Square Road location in Clarksburg Town Center has been developed, and library construction could start today.
- The Town Center library land has been given to the county. The land from the other location needs to be purchased.
- Previous plans (Master Plan and various site plan approvals) were approved with a Town Center location for the library.
- County representatives promised the Town Center residents they would get a library in Clarksburg Town Center.
- The budget for the new library location has more than doubled the previous budget.
- This new library analysis has delayed the construction timeline of the library, which is unfair to the community.
- If the county wants to build affordable housing, use the Stringtown Road location to build housing and build the library as promised in Clarksburg Town Center.

We respectfully thank you for your consideration.

Shawn & Laura Fletcher  
Residents of Clarksburg Town Center
