

I am a resident on Palatine Drive.

Our property abuts the proposed development.

We have had chronic problems with our sewer system since moving into our home in 1993.

This requires bi-yearly management by Busy Service at a cost of \$500 per visit. This does not include additional labor and/or parts which are needed every year.

We are firmly against connection of the proposed subdivision into our sewer system.

The current system is 30+ years old.

It cannot tolerate further strain.

Thank you.
