

**New Sewer Line request:**

I am a resident of [REDACTED] Palatine Drive Potomac MD 20854. I was just made aware that there is a request to get new Sewage connection for 3-4 lots that would be built next to Palatine community. I would strongly oppose this request. Palatine community has had an ongoing sewage problem with many houses experiencing one or more sewage backups. Our house has had 3 sewage backups, the last one being in February of 2024. We have had over 150k of damage in last sewage back and 9 months later we are still dealing with renovation and insurance company. Palatine sewage situation which is already bad will get worse with this connection. These lots have one house with septic tank and well water. They just need to extend that system.
