

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Marc Elrich County Executive Jon Monger Director

December 20, 2024

Mr. Lee Currey, Director Water and Science Administration Maryland Department of the Environment 1800 Washington Boulevard Baltimore, Maryland 21230

Dear Mr. Currey,

I am pleased to submit Montgomery County's Fiscal Year (FY) 2024 Municipal Separate Storm Sewer System (MS4) Annual Report in compliance with our MS4 Permit requirements. This submission is the third report in this current permit cycle (November 5, 2021, through November 4, 2026). It includes the georeferenced database, referred to in this report as the National Pollutant Discharge Elimination System (NPDES) MS4 Geodatabase, and supplemental databases. The MS4 Annual report highlights the County's progress between July 1, 2023, and June 30, 2024. The FY2024 Countywide Stormwater Total Maximum Daily Load (TMDL) Implementation Plan, Good Housekeeping Plan (GHP), and Salt Management Plan (SMP) are accompanying this submission. The date of this submission satisfies the requirement to submit an annual report by December 31, 2024. The associated databases, models, and supporting information were transmitted via electronic transfer to Maryland Department of the Environment (MDE) staff on December 20, 2024.

The County continues to be a leader in implementing innovative and aggressive stormwater programs. By the end of FY2024, Year 3 of the 2021 Permit, the county had achieved 66 percent of the 1,814-acre restoration goal. The County's implementation schedule for the remaining years of the permit shows that it will continue to meet and exceed the annual restoration benchmark schedule outlined in the Permit.

With this report, the County continues to exemplify compliance with the requirements of the MS4 permit. This includes maintaining adequate legal authority, identifying pollutant sources, expanding our stormwater facility maintenance and inspection program, enhancing property management programs to reduce stormwater pollution, expanding our stormwater pollution awareness outreach programs, making progress on meeting the County wasteload allocations for approved TMDLs, and assuring adequate funding for the Permit-required programs. These efforts are made by many departments and agencies

throughout the county and represent a comprehensive approach to improving our stream health and water quality.

Thank you for the opportunity to submit a report on our ongoing implementation of the 2021 MS4 Permit. As seen by our outstanding efforts, Montgomery County continues leading local efforts in Maryland to protect and restore local watersheds, our rivers, and the Chesapeake Bay. If there are any questions on the County's submission, please contact Amy Stevens, Division Chief, Watershed Restoration Division, at 240-777-7766.

Sincerely,

Jon Monger

Jon Monger Director
