

GenOn Mid Atlantic, LLC
Dickerson Generating Station
Report to DAFIG for December 8, 2020

Continue with coal plant decommissioning

16k tons of coal mixed with clay (liner under coal pile) scrapped and sent for proper disposal.

96k gallons of various oil grades drained and sent for recycling. Recycler paid for oil and transported at their expense.

Drained and cleaned onsite sewage treatment plant, FGD wastewater treatment plant, coal pile runoff basin.

Removed 8800 synthetic bags and cages (steel) from baghouse (air emissions control). Bags w/ ash sent for proper disposal and steel cages went to metal recycler.

Petitioned MDE to deactivate the Title V air permit for coal units. MED agreed. Continue with air permit for CT units.

Separation of CT Units

Establish source of cooling water for emissions control of CT units.

Subdivided property; ~ 90 acres of the 917 total acres.

Establish controls at GenOn's Chalk Point Generating Station (Prince George's County). Still 4 employees on the Dickerson CT site, indefinitely.

Caretaking of coal plant past employee presence

Transition to occur between Jan and March 2021.

Coal plant to be shuttered; water and electricity off, waiting a buyer and demolition.
