

Q1 2021 DA FIG Report for GenOn Dickerson Facility

Coal Plant Decommissioning/Caretaking

- Former coal yard seeded, waiting on spring growth
- Final decommissioning of coal plant building expected in April
- River water access to continue to provide water to Combustion Turbines (CT) and NMWDA
- Eliminate or dramatically reduce NPDES permit and water appropriation in 2021
- Restructuring legal entities to separate Coal Related property from CT areas
- Single Caretaker on site after April to monitor day to day and support salvage efforts on the former coal plant property
- Security changes underway to accommodate electronic access and monitoring for defined stakeholders

Combustion Turbine Site

- Staffed by 3 remaining CT Techs
- Organizationally consolidated with Chalk Point Generating Station with shared support services
- Re-routing source of site water away from coal plant building

Westland Ash Landfill

- Ash mining activities resumed 22Feb21
