Dear Jamie:

Enclosed is the monthly meteorological report for the Gude Drive Landfill sites meteorological instrumentation for September 2020. All the instrumentation functioned normally during September except for the rain gauge which did not register rainfall during most of August and September. It was found that the rain gauge had a large spider web inside the gauge that was keeping it from tipping. It was cleaned out on September 15, 2020. Data recovery for all the parameters was near 100%. September precipitation total could not be determined due to the problem with the rain gauge tipping mechanism.

Attached is a wind rose for the month of September 2020 and a table showing the data collection percentage for each parameter in 2020.

If you have any questions, please call or e-mail them to me.

Best regards,

Mark Abrams
