**ARCHITECTURAL COMPATIBILITY COSTS**

The MPDU Executive Regulations cap Architectural Compatibility at 10% of the allowable MPDU Base Cost (Line 24.c, Page 2). The Director of DHCA does not have the authority to waive or exceed this cap. The direct construction costs for architectural compatibility must be approved by DHCA. The percentage for construction financing in Line 32.a is obtained from the calculations determined in Line 22.a on Page 2. The cost of the architectural compatibility items must be reduced by a credit for normal construction items which are included in the direct construction cost (for example, brick façade reduced by the cost of vinyl siding). Documentation (contracts or estimates) is required for all architectural compatibility items.
