

PEACHTREE ROAD PERMANENT PATCHING PROJECT

Dickerson/Boys, MD

PURPOSE

This newsletter is to inform you of the upcoming permanent patching of Peachtree Road from Darnestown Road to Barnesville Road. Please see the reverse side of this newsletter for the project map. This project will consist of patching, wedging shouldering, and the application of full width Tar N' Chip. This pavement management preservation project employs long term strategies to improve roadway conditions.

IMPACTS

No parking signs may be posted in advance of resurfacing on your street and flaggers will maintain traffic flow. You will have access to your driveway and street throughout the duration of the project. Please walk or drive carefully through the work zone and obey all posted signage. We thank you for your cooperation and patience as we work to improve the County infrastructure for residents and users.

SCHEDULE

The first phase of this project (patching & wedging) will take place in July and is expected to take four to six weeks to complete. The second phase (Tar N' Chip) is expected to take place in August/September and two to three weeks to complete. Work hours will be between 7:00 AM and 5:00 PM, Monday through Friday.
