

# We're Walking Here

## What is a Pedestrian Hybrid Beacon (PHB)?

A PHB is a hybrid between a signal and a beacon designed to help pedestrians safely cross busy streets.

Motorists are responsible to SLOW DOWN on solid yellow and STOP on red, just like a signal.

Pedestrians are responsible to activate the push-button and WAIT for the Pedestrian Signal to safely cross, just like a signal.

### PEDESTRIANS

#### Will see this

#### Will do this

Push button to call for the WALK signal

Wait (It may take up to 30 seconds for the signal to change)

Wait

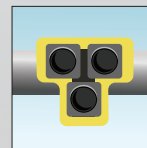

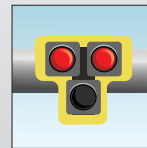

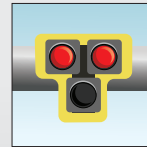

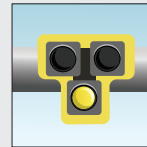

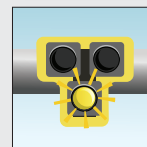

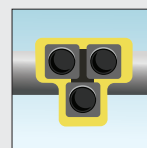

Start crossing after you see the WALK signal (Be sure traffic has stopped)

Continue Crossing (countdown signal)

Upon completion of the cycle the pedestrian signal will return to the Do Not Cross hand symbol

### MOTORISTS

#### Will see this

#### Will do this

Proceed

Proceed with Caution (signal has been activated)

Slow down and prepare to STOP

STOP

STOP

Proceed if clear
