Sediment Control Permit Application

Stormwater Concept # Preliminary Plan # Sediment Control Permit #

A. Project Information. Complete all entries. Place "NA" where not applicable.

Subdivision/Project Name:

Property Size/Area: Square Feet (Acres for Forest Harvest Permits)

Property Address/Location:

Lot(s): Block(s): Parcel(s): Watershed:

B. Property Owner Information. Complete all entries. Place "NA" where not applicable.

Name Property Owner's Name

Mailing Address City State Zip Code

Cell Telephone Work Telephone Email

C. Engineer Information. Complete all entries. Place "NA" where not applicable.

Name Firm Name and/or Contact Person

Mailing Address City State Zip Code

Cell Telephone Work Telephone Email

D. Type of Application. Complete applicable boxes only.

Small Land Disturbance (SLDA) Engineered Permit for Single Family Lot
Total Disturbed Area: Square Feet
Total Amount of Earth Movement Cubic Yards
Estimated Stormwater Management Cost: \$
(Attach copy of Estimate)

Engineered Sediment Control Forest Harvest
Total Disturbed Area: Square Feet
Rough Grading Only Full Construction Stormwater Maintenance
For Plans requiring Stormwater Management - Estimated Stormwater Mgmt Costs: \$
(Attach copy of Estimate)

Revision to Previously Approved Sediment Control Plan*
* Revision Plan Type: Original Sediment Control Permit #
Remove Rough Grading Only/Add Bldg. Construction Add/Revise Stormwater Management
Revise Sediment Control and/or Site Development Plan As-Built Submission
Builder's Sediment Control/Ownership Transfer (Completed DPS Transfer Form must be provided.)
Other

Total Additional Disturbed Area Square Feet
Total Revised Disturbed Area Square Feet
Change in estimated Stormwater Management Costs: \$ (Attach Copy of Estimate)

E. Additional Information Required

- Is the land disturbing activity within/near the 100-year floodplain limits of a channel, drainageway, stream or creek?
 Yes No
- If YES, provide the drainage area to the property above the construction activity (in acres) _____. If the drainage area is 30 acres or greater a Floodplain District Permit may be required.
- Is the proposed land disturbing activity within a designated wetland? Yes No
- Is the proposed land disturbing activity within a designated Special Protection Area? Yes No

I declare and affirm, under penalty of perjury, that to the best of my knowledge, information and belief all matters and facts in this application are correct. I declare that I am the owner of the property or duly authorized to make this application on behalf of the owner and the standard conditions noted herein are made part of the approved Sediment Control Plans. I have read and I understand the Conditions of Approval.

F. Conditions of Approval

1. All sediment control work must comply with written requirements, the approved Sediment Control Plan, "Standards and Specifications for Soil Erosion and Sediment Control" and /or all violation notices, which may be issued by the Department.
2. The site, work materials, plans, and specifications shall be available at all times for inspection by the Department.
3. The sediment control permit is subject to revocation or suspension whenever determination is made and after notice is given that the applicant is in violation of State and County sediment control laws or any rules and regulations promulgated under those laws. This includes conditions specified on the approved plan.
4. If the Department finds that the original sediment control plans are inadequate or inappropriate, then additional plans or modifications thereof will be required.
5. A grading permit must be obtained prior to start of any earthwork, construction, etc., within dedicated street rights-of-way.
6. Any temporary sediment basin or trap which will pond water in a pool greater than 9 feet in diameter and 18 inches in depth must be surrounded by permanent, semi-permanent or portable fences not less than 42 inches in height with openings not greater than three inches in width. This fence must be firmly anchored and constructed in a manner to prevent sagging, and be maintained in good condition.
7. DPS approval of a sediment control or stormwater management plan is for demonstrated compliance with minimum environmental runoff treatment standards and does not create or imply any right to divert or concentrate runoff onto any adjacent property without that property owner's permission. It does not relieve the design engineer or other responsible person of professional liability or ethical responsibility for the adequacy of the drainage design as it affects uphill or downhill properties.
