Net Impact				7,180	89	221	781	1,360	2,090	2,639	

DESCRIPTION

This project provides for the design and construction of stormwater management retrofit projects. The Department of Environmental Protection (DEP) conducts assessments of watershed management needs and related facility planning evaluations of retrofit project alternatives under Facility Planning: SM (PDF No. 809319). Based upon the results of these evaluations, specific retrofit projects are designed and constructed. Adding new stormwater controls in developed areas which lack such controls is required in the County's National Pollutant Discharge Elimination System (NPDES) Municipal Stormwater Discharge Permit. Where feasible, designs of retrofit projects include wetland features to add habitat and help address wetland goals of the Chesapeake Bay 2000 Agreement. In small drainage areas, retrofit projects may also include biofiltration, bioretention, or stormwater filtering devices.

COST CHANGE

Cost increase due to increased scope to meet the requirements of the new NPDES Municipal Separate Storm Sewer System (MS-4) permit and the addition of FY15 and FY16 (less FY09 partial closeout) to this ongoing project. To help comply with the new MS-4 requirement to control stormwater on 20% of impervious surfaces not currently treated, additional subprojects have been programmed through FY16 from the Department's inventory of potential stormwater retrofit projects. These include, in addition to the projects listed below under "Other," new retrofit projects in the Rock Creek, Paint Branch, Northwest Branch, Cabin John Creek/Watts Branch, Muddy Branch, and Great Seneca Creek watersheds.

JUSTIFICATION

This project will improve water quality and improve and protect habitat conditions in local streams. The project supports the goals of the Chesapeake Bay tributary strategy initiatives and the Anacostia Watershed Restoration Agreement; addresses County municipal National Pollutant Discharge Elimination System (NPDES) discharge permit requirements; and implements the County's adopted water quality goals (Chapter 19, Article IV). The County's new NPDES Municipal Separate Storm Sewer System (MS-4) permit requires that the County provide stormwater controls for 20% (about 5,200 acres) of impervious surfaces not currently treated "to the maximum extent practicable." This project will be responsible for controlling stormwater on a large proportion of the impervious area needed to satisfy this permit requirement. Inventories of potential projects have been conducted under the Facility Planning: SM project in the Paint Branch, Rock Creek, Cabin John Creek, Hawlings River, Watts Branch, and Northwest Branch watersheds.

OTHER

Construction FY11 - National Institutes of Health, Brookville Depot, Pueblo Court, Knightsbridge/Chase Ridge, Hunters Woods (Blue Smoke Court), Fallsberry, and Verizon. Construction FY12 - Falls Reach, Dumont Oaks II, and other projects to be determined.

FISCAL NOTE

Programmed G.O. bonds and Water Quality Protection Charge revenue replaced with Water Quality Protection bonds. FY10 funding in the amount of \$212,000 for the Germantown Estates Stormwater Management Retrofit subproject provided under an American Recovery and Reinvestment Act (ARRA) stimulus grant through the Maryland Department of the Environment's 2008 Water Quality State Revolving Fund Amended Intended Use Plan.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY87	(\$000)
First Cost Estimate	FY11	56,824
Current Scope		
Last FY's Cost Estimate		56,824
Appropriation Request	FY12	2,425
Supplemental Appropriation Request		0
Transfer		0
Cumulative Appropriation		5,625
Expenditures / Encumbrances		1,278
Unencumbered Balance		4,347
Partial Closeout Thru	FY09	12,268
New Partial Closeout	FY10	973
Total Partial Closeout		13,241

COORDINATION

Department of Transportation
Maryland National Capital Park and Planning Commission
Department of Permitting Services
Maryland Department of the Environment
Natural Resources Conservation Service
U.S. Army Corps of Engineers
