RESPONSE: EMERGENCY ASSISTANCE AND DEMAND

Estimates are based on best available information on 11.15.2021 for the prior week (Monday-Sunday) unless otherwise noted.
Denials are primarily due to applicants not having a covid financial hardship, seeking mortgage support, exceeding income requirements or not demonstrating county residence.

**APPLICATION STATUS**

- **RECEIVED** 28%
- **ASSIGNED & UNDER REVIEW** 11%
- **DENIED** 12%
- **PROCESSED** 50%

**SELF-REPORTED CHARACTERISTICS**

- **48%** OF TENANT APPLICANTS MATCHED WITH LANDLORD APPLICATION
- **54%** UNEMPLOYED PAST 90 DAYS
- **27%** NEEDED TO CARE FOR SELF/OTHERS
- **25%** RECEIVED EVICTION NOTICE (SELF-REPORTED)
The current round of funding adds to 2 previous rounds of COVID19 assistance.

- **AVERAGE CLIENT PAYMENT:** $10.2k
- **64%** of Payments Arrears; **36%** Prospective
- **47%** of Awarded Households located in high-need areas as defined by Homeless Prevention Index

IMPACT OF COVID-19: UNEMPLOYMENT RATE IN MONTGOMERY COUNTY

Note: The local unemployment figures below are not “seasonally adjusted.” Summer months tend to see a cyclical increase each year due to the end of the school year (ex: teachers) – see also, for instance, the increase from May to June in 2019 pre-COVID.
COVID-19

</tbody>
</table>

*The number of vaccinated may exceed the estimated population by age group due to margin of errors associated with population estimates and vaccine data entry issues. For these reasons, the CDC caps percentages at 99.9%.

Percentage of 12-17 year olds vaccinated reported as 90% confidence range because of higher margin of error. In this age group, 84,465 have received their first dose and 74,383 have received their second dose as of 11.16.2021.

---

*YYYY.*
Charts below reflect only complete weeks of data, i.e., up to 11.12.2021. Data were pulled from Immunet on 11.15.2021 and are subject to retroactive changes.

**NOTE:** These data do not include county residents vaccinated outside of Maryland.

**WEEKLY VOLUME BY AGE (FIRST DOSES ONLY)**

Note: An additional dose is considered any dose beyond two administered to an individual on or after 8.13.2021.

**WEEKLY VOLUME BY PROVIDER (ALL DOSES)**

MC DHHS accounted for 28% of dose administrations week of Nov 6.

Darker shades = “In” County
Lighter shades = “Out” of County
With the recent expansion of vaccine eligibility to age 5 and older, the gap between White NH residents and Black/AA residents has grown to 5 percentage points.

Source: IMMUNET (as of 11.16.21) and Census ACS 2019 via iPUMS.org. Note: Does NOT include County residents who received a vaccine outside of the State of Maryland.

Note: More than 10% of vaccine records do not include complete race/ethnicity data. This data also does not include residents vaccinated outside of the State of Maryland. This chart is therefore based on a large but incomplete sample, thereby under-reporting the actual vaccinate rate for each group. The reader is therefore encouraged to focus on the relative vs. the absolute rates.
**FIRST DOSE BY RACE/ETHNICITY AMONG 5-11 YEAR OLDS**

- Black or AA
- Hispanic
- Asian & PI
- White
- Other

% of population % of 5-11 year olds who received first dose

<1% of vaccinated currently identify as Native American; they are included in the “Other” category. Nearly 3% of current pediatric records do not have a race or ethnicity listed.

**Montgomery County DHHS, in partnership with MCPS, has administered most of the pediatric vaccinations in the county in the first two weeks since FDA approval.**

**Vaccination rates among residents ages 5-14 are used as a proxy for pediatric vaccination rates on this map due to the availability of population estimates only for certain age categories.**

**Zip codes with fewer than 100 residents ages 5-14 are excluded.**
**COVID-19 CASES AND HOSPITALIZATIONS: LAST FOUR WEEKS (10.18 to 11.14)**

**CASES AND HOSPITALIZATIONS**

<table>
<thead>
<tr>
<th>4-WEEK TOTAL CASES:</th>
<th>1,934</th>
</tr>
</thead>
<tbody>
<tr>
<td>4-WEEK TOTAL HOSPITALIZATIONS:</td>
<td>62 (3% of cases)</td>
</tr>
</tbody>
</table>

**RATES PER 100,000 BY AGE GROUP**

The highest case rates over the last 4 weeks are among the youngest age groups. The senior population continues to experience the highest hospitalization rates.

<table>
<thead>
<tr>
<th>WEEK START DATE</th>
<th>Cases</th>
<th>Hospitalizations</th>
</tr>
</thead>
<tbody>
<tr>
<td>18-Oct</td>
<td>475</td>
<td>16 (3%)</td>
</tr>
<tr>
<td>25-Oct</td>
<td>502</td>
<td>23 (5%)</td>
</tr>
<tr>
<td>1-Nov</td>
<td>486</td>
<td>15 (3%)</td>
</tr>
<tr>
<td>8-Nov</td>
<td>471*</td>
<td>8 (2%)</td>
</tr>
</tbody>
</table>

Case rate is calculated for the four-week period noted above. Hospitalization data for these age categories must be interpreted with caution due to count <10 affecting reliability.

**RATES PER 100,000 BY RACE/ETHNICITY**

The differences in hospitalization rates between Hispanic, Black, and White populations are continuing to trend downwards. The Asian population continues to have the lowest case and hospitalization rates.

<table>
<thead>
<tr>
<th>Race/Ethnicity</th>
<th>Case rate</th>
<th>Hospitalization rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hispanic</td>
<td>6.2</td>
<td>212.6</td>
</tr>
<tr>
<td>Black (Non-Hispanic)</td>
<td>7.1</td>
<td>138.5</td>
</tr>
<tr>
<td>White (Non-Hispanic)</td>
<td>4.9</td>
<td>158.8</td>
</tr>
<tr>
<td>Asian (Non-Hispanic)</td>
<td>22.0</td>
<td>1.3 *</td>
</tr>
</tbody>
</table>

Note: Data on race and ethnicity is not always collected. In the past 4 weeks, 16% of cases were entered as “Other” and 8% were “Unknown.”

Case rate is calculated for the four-week period noted above. Hospitalization data for this race/ethnicity must be interpreted with caution due to count <10 affecting reliability.
Case rate is calculated for the four-week period noted above. Number of cases are noted in parentheses.

Excludes zip codes with populations under 10,000.

Note: Not all case data include zip code information.

Breakthrough hospitalizations by age group cannot be published due to small counts (<10) per age group category. Nineteen of the 22 breakthrough hospitalizations were among those older than 50.

*Age unknown for 3 cases.

The population aged 12+ is considered the vaccine-eligible segment of the population for which enough time has passed since vaccine authorization for these individuals to become fully vaccinated. We will adjust the population in this analysis to ages 5+ in two to three weeks.

Calculations are based on cases and hospitalizations in the four-week period noted above.
