COVID-19 VACCINATIONS: TOTALS FROM CDC

TOTAL VACCINATIONS (AS OF 4/11/22)

• ≥95%* of total population received at least ONE DOSE \[N=1,068,693\]

• 87% of total population received at least TWO DOSES (fully vaccinated) \[\text{N}=911,934\]

• 54% of fully vaccinated population received a FIRST BOOSTER/ADDITIONAL DOSE \[\text{N}=492,930\]

*The CDC caps percentages at 95% to account for margins of error in data entry and population estimates.

NOTE: On 4/15/22, Maryland made updates to previously submitted data to the CDC that resulted in a decrease of 50,176 doses administered. Some percentages may have decreased as a result.

NOTE: The CDC vaccination count includes Montgomery County residents who received their shots in Maryland or outside the state. It also includes vaccinations administered in some federal entities within Montgomery County.

VACCINATIONS BY AGE GROUP

Chart reflects percent of total age group population that received doses. Percentage estimates are reflected as ranges for ages 12-17 and ages 5-11 due to higher margins of error.

• 58% of the fully vaccinated 12+ population received a FIRST BOOSTER/ADDITIONAL DOSE \[\text{N}=492,726\]

• 77% of the fully vaccinated 65+ population received a FIRST BOOSTER/ADDITIONAL DOSE \[\text{N}=129,637\]
Charts below show most recent full weeks of data, up to April 10, 2022.

**VACCINATIONS BY DOSE**

- ADDITIONAL DOSE
- SECOND
- FIRST & SINGLE

**ADDITIONAL DOSES BY AGE GROUP**

An additional dose is the third or fourth dose identified for individuals first administered Pfizer or Moderna, and the second or third dose identified for individuals first administered J&J. Doses are counted without regard to date. Total counts are estimations and imprecise due to entry errors and missing doses for Marylanders who received any of their doses out of state.

Unlike the CDC vaccination data, data from Maryland Health Department only include Montgomery County residents who were vaccinated in Maryland. Totals do not include vaccinations administered at federal entities within the county to non-residents.
Across the highlighted tracts above, 30% of the population is White non-Hispanic, 30% is Black non-Hispanic, 24% is Hispanic, and 12% is Asian/Pacific Islander.
COVID-19 VACCINATIONS: PEDIATRIC VACCINATIONS

FIRST DOSES BY RACE/ETHNICITY

Charts reads: 20% of 5-11 population are NH Black, and 16% of vaccinated 5-11 population are NH Black. <1% of vaccinated children identify as Native American; they are included in the “Other” category. Approximately 3% of pediatric records do not contain race/ethnicity information.

FIRST-DOSE VACCINATION RATES BY ZIP CODE

Vaccination rates among residents ages 5-14 are used as a proxy for pediatric vaccination rates in the map below due to the availability of population estimates only for certain age categories. Zip codes with fewer than 100 residents ages 5-14 are excluded.

PEDIATRIC VACCINE PROVIDERS
