COVID-19 DEATHS

Monthly COVID-19 Deaths
As of 7/1/22

Montgomery County  Maryland

*VSA revised death data on May 27, 2021 to include COVID-19 deaths not previously counted.

NOTE: Monthly totals are based on the date death was reported, which may not be the same as the date on which the death occurred.

*VSA revised death data on May 27, 2021 to include COVID-19 deaths not previously counted.
NOTE: Hospitalization rates for the boosted population are not available as a separate measure.
COVID-19 VACCINATIONS: TOTALS FROM CDC

TOTAL VACCINATIONS (AS OF 6/29/22)

- **≥95%** of total population received at least ONE DOSE [N=1,091,821]

- **88%** of total population received at least TWO DOSES (fully vaccinated) [N=928,939]

- **57%** of fully vaccinated population received a FIRST BOOSTER/ADDITIONAL DOSE [N=532,881]

*The CDC caps percentages at 95% to account for margins of error in data entry and population estimates.

NOTE: On 4/15/22, Maryland made updates to previously submitted data to the CDC that resulted in a decrease of 50,176 doses administered. Some percentages may have decreased as a result.

NOTE: The CDC vaccination count includes Montgomery County residents who received their shots in Maryland or outside the state. It also includes vaccinations administered in some federal entities within Montgomery County.

VACCINATIONS BY AGE GROUP

- **≥95%** of the fully vaccinated 12+ population received a FIRST BOOSTER/ADDITIONAL DOSE [N=524,084]

- **80%** of the fully vaccinated 65+ population received a FIRST BOOSTER/ADDITIONAL DOSE [N=137,392]

Chart reflects percent of total age group population that received doses. Percentage estimates are reflected as ranges for ages 12-17 and ages 5-11 due to higher margins of error.
Charts below show most recent full weeks of data, up to June 26, 2022.

**VACCINATIONS BY DOSE**

A first booster is defined as the third in a series of two Pfizer or Moderna doses, or the second if recipient received J&J as first dose. A second booster is defined as either the third or fourth dose, depending on whether recipient received J&J as initial dose. Doses are counted without regard to date. Total counts are estimations and imprecise due to entry errors and missing doses for Marylanders who received any of their doses out of state.

Unlike the CDC vaccination data, data from Maryland Health Department only include Montgomery County residents who were vaccinated in Maryland. Totals do not include vaccinations administered at federal entities within the county to non-residents.
