- **58%** of the fully vaccinated 5+ population received a FIRST BOOSTER/ADDITIONAL DOSE [N=537,443]
- **80%** of the fully vaccinated 65+ population received a FIRST BOOSTER/ADDITIONAL DOSE [N=138,022]
Charts below show most recent full weeks of data, up to **July 10, 2022**.

**VACCINATIONS BY DOSE**

A first booster is defined as the third in a series of two Pfizer or Moderna doses, or the second if recipient received J&J as first dose. A second booster is defined as either the third or fourth dose, depending on whether recipient received J&J as initial dose. Doses are counted without regard to date. Total counts are estimations and imprecise due to entry errors and missing doses for Marylanders who received any of their doses out of state.

Unlike the CDC vaccination data, data from Maryland Health Department only include Montgomery County residents who were vaccinated in Maryland. Totals do not include vaccinations administered at federal entities within the county to non-residents.
Across the highlighted tracts above, 30% of the population is White non-Hispanic, 30% is Black non-Hispanic, 24% is Hispanic, and 12% is Asian/Pacific Islander.
