PROJECT JUSTIFICATION

- MCDOT evaluates requests for pedestrian facilities based on their ability to serve a public use and enhance public safety.
- Sidewalk Program Goal: To provide safer access for pedestrians and people with disabilities and to improve pedestrian access to schools, nearby public transportation, and public facilities. Sidewalks remove pedestrians from the roadway and create a separation between pedestrians and oncoming traffic.
- The new sidewalks will connect to existing sidewalks and provide safer pedestrian access to schools, public transportation, and other attractions.

TREE REMOVAL & REPLACEMENT

- 5 trees will be removed from the County's public right-of-way to make way for the sidewalks.
- 3 trees will be planted for every 1 tree removed, or 15 right-of-way trees will be planted after the sidewalks are installed, if approved.
- The available replacement tree species can be viewed on the Division of Highway Services' Tree Maintenance website: <https://www.montgomerycountymd.gov/DOT-Highway/tree/>
- Following the installations, if approved, the County Arborist will visit each property at which one or more right-of-way tree(s) was removed to discuss your preferred tree species and their spatial requirements.
- All replacement trees will be planted back into the County's public right-of-way.

Redwing Road Sidewalk Proposal

COSTS & ASSESSMENTS

- The estimated cost for installing the Redwing Road sidewalks is approximately \$169,850.40. Costs include construction, inspection, and administrative costs.
- Funding for this project will be provided under the County's Sidewalk Program, CIP No. 0506747
- Although sidewalk installation is statistically known to augment property values, there are no properties considered to be specially benefited by the proposed improvement. Therefore, no properties are expected to be assessed.
