

Lyttonsville Community Sidewalk Project

Project to Begin Monday, June 1, 2020

PURPOSE

This newsletter is to inform you of the upcoming sidewalk installation along the following Lyttonsville roadways:

- the Northwest Side of Michigan Avenue from Maine Avenue to Pennsylvania Avenue;
- the North Side of Pennsylvania Avenue from Existing Sidewalk to Michigan Avenue;
- the South Side of Pennsylvania Avenue from Kansas Avenue to Lanier Drive; and
- the Northwest Side of Kansas Avenue from Albert Stewart Lane to Pennsylvania Avenue.

Please see Project Map located on the reverse side of this newsletter.

BACKGROUND

The Annual Sidewalk Program is a section of The Montgomery County Department of Transportation's (MCDOT) Division of Transporta-

tion Engineering (DTE). The afore-mentioned sidewalk was proposed to the community and was the subject of a Public Hearing on October 2, 2019. On February 20, 2020, the Recommendations approving the sidewalk installation were signed by Director, Christopher Conklin.

SCOPE OF PROJECT

A five-foot sidewalk with a variable 0 to 3-ft greenspace will be constructed on the above-referenced roadways.

SCHEDULE

This project is scheduled to begin on June 1, 2020 and will take 2 to 3 weeks, weather pending, to complete. Work hours will be between 7 am and 5 pm, Monday through Friday.

PROJECT WORK PLAN

Generally, the work will proceed as follows:

1. Tree Removal— The trees that are slated for removal will be removed beginning June 1. Construction may take place simultaneously. No parking signs will be placed around the subject trees prior to removing.

2. Markings in Right of Way & No Parking Signs - Sidewalk locations will be marked out in white paint in the public right-of-way. No parking signs will be erected along the limits of sidewalk installation.

3. Excavation for Setting of Sidewalk

Forms— The excavation will begin for sidewalk construction and the placement of concrete forms for the pouring of concrete sidewalk, lead-walks and driveway aprons.

4. Pouring of Concrete— Once concrete has cured, the forms will be removed and topsoil, seed and straw will be added to backfill to meet with existing grade.

5. Sealant - A sealant will be sprayed upon sidewalk and driveway aprons to preserve and protect from harsh winter chemicals.

NOTICE OF SIDEWALK INSTALLATION

Pennsylvania, Michigan & Kansas Avenues

SAFETY NOTICE

Please drive gently and safely through the work site and kindly remember that while installation work is underway, personnel and construction vehicles will be moving around the site. Some materials may be stored in the area. Please use caution when walking or driving through the construction zone. Children may be attracted to the noise and machinery, so we ask that you please keep all children under close supervision at all times, even after the work is completed for the day. Also, please follow the direction of flagmen and temporary signs and traffic control devices. We appreciate your patience and cooperation. *If, for some reason, you have a medical condition that could be potentially impacted by the construction activities, please alert the below-listed Inspector.*
