

Sending Locator Text (SMS)

Sends a text message to the calling party to have their location shared onto the map.
(Different than sharing a map)

❖ Select & pull up shared map

❖ On the Desktop or MDC Select  **Add** button

Top left of screen

❖ On the App you must select the Folder icon  then the  **Add** button

❖ Select Locator under Map Objects

 **Locator**
real-time location tracking

❖ Select **SMS Locator**

❖ Type Label, Phone # and Message. Click Ok.

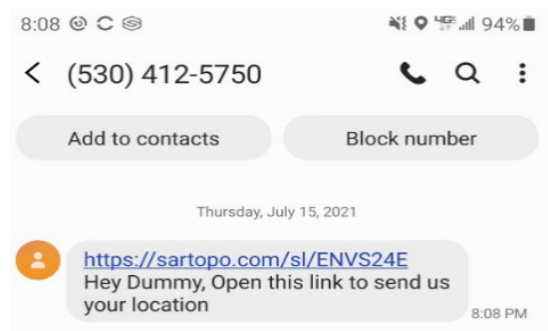

Suggested Message:

“This is 911. Open this link to send us your location. Leave this page open.”

SMS Locator		X
-------------	--	---

Send someone a text message in order to record their location on the map. Their phone will need a web browser and an active data connection to respond.

Label	Victim #1	Name shown on the map
Target Phone #	443-807-8889	eg: 530-555-0123
Message	Hey Dummy, Open this link to send us your location (80 char max)	

❖ Alert person to expect the message & open the link

❖ **Location will appear on selected map!**

Will only track the phone while
this page is open on their phone

A SARTopo user has requested your location.

Hey Dummy, Open this link to send us your location

Update: 8:08:31 PM

Have location, accuracy: +/-10m

Coordinates: 39.46048, -76.63405

Success!

Your location has been reported.

Your location will continue to update as long as this page is open.
