

**MONTGOMERY COUNTY FIRE AND RESCUE SERVICE
DRIVER/OPERATOR TRAINING PROGRAM**

Practical Application Guide Sheet

Pneumatic Tools

Candidate Performance Competency: The candidate will demonstrate proficiency in the use of pneumatic tools carried on their apparatus.

Task	Value	Score
1. Identify all pneumatic tools carried on the apparatus and indicate their use.	10	
2. Identify all air sources for pneumatic tools.	10	
3. Identify all adapters that allow for tools to be used from all previously identified air sources.	10	
4. Identify the working pressure for all air tools carried on the apparatus.	10	
5. Identify the appropriate hose for the pneumatic tools and indicate its working pressure.	10	
6. Place in service an impact wrench with the appropriate type of socket.	10	
7. Place in service an air ratchet. Indicate the differences between the ratchet and impact wrench.	10	
8. Place in service an air chisel. Identify the types of bits, their uses, and how to change the bits.	10	
9. Demonstrate the process of maintaining proper air pressure with on-board and portable air sources.	10	
10. Demonstrate and explain the maintenance required for all pneumatic tools post-use, monthly, and annually.	10	
Total Points	100	

Evaluator: Initial beside the final outcome of the exam below.

____ **PASS** ____ **FAIL – Overall Points (<70)**

_____ **Evaluator Name**

_____ **Date**
