VISION ZERO
NO TRAFFIC DEATHS BY 2030

OUR PLAN TO ELIMINATE FATALITIES AND SERIOUS INJURIES ON OUR ROADS BY 2030

PRESENTATION TO GREATER SHADY GROVE TMD • 03/04/20
WHAT IS VISION ZERO?
1. Transportation–related deaths and severe injuries are preventable and unacceptable.

2. Human life takes priority over mobility and other objectives of the road system. The road system should be safe for all users, for all modes of transportation, in all communities, and for people of all ages and abilities.

3. Human error is inevitable; the transportation system should be designed to anticipate error so the consequences are not severe injury or death.

4. People are inherently vulnerable, and speed is a fundamental predictor of crash survival. The transportation system should be designed for speeds that protect human life.

5. Safe human behaviors, education, and enforcement are essential contributors to a safe system.

6. Policies and practices at all levels of government need to align, making safety the highest priority for roadways.

Vision Zero Cities

A Vision Zero City meets the following minimum standards:

- Sets clear goal of eliminating traffic fatalities and severe injuries
- Mayor has publicly, officially committed to Vision Zero
- Vision Zero plan or strategy is in place, or Mayor has committed to doing so in clear time frame
- Key city departments (including Police, Transportation and Public Health) are engaged.

VISION ZERO
2020 ACTION PLAN
The Vision Zero Two-Year Action Plan set out reduction targets of 20% and 35% in 2018 and 2019 compared to the 2012-2016 average.

Preliminary 2019 data show 265 serious and fatal collisions, a 28% reduction from the 2012-2016 average. Targets for vehicle occupants and cyclists were met, but pedestrian crashes did not meet the target.

Source: MCPD

*2019 data are preliminary and subject to change
In 2019, there were 31 fatal crashes with 32 fatalities. This matches the 2014-2018 5-year historical average.

After four consecutive years of decline and a record low in 2018, the number of fatal crashes for vehicle occupants increased in 2019.

There was one fewer pedestrian fatality in 2019 compared to 2018. Nationwide, pedestrian fatalities are increasing by 35% from 2008 to 2017.

*2019 data are preliminary and subject to change
The High Injury Network (HIN) identifies roadway segments that have a higher amount of crashes (at least one crash per mile per year) relative to the amount of traffic on that road. MCDOT will use this initial list to identify roadways for engineering improvements.
The High Injury Network (HIN) roadways of concern in the Greater Shady Grove TMD are mainly located in Wheaton, Glenmont, and Aspen Hill. With the exceptions of Bel Pre Rd, Crabbs Branch Way, and E Gude Dr, and Shady Grove Rd, these HIN roadways are controlled and maintained by the State Highway Administration.
Crash Density was higher in neighborhoods with:

- Higher Percentage of households that speak English less than “very well”
- Higher Percentage of population that is Hispanic or Latino
- Higher Percentage of households below the poverty level
- Lower Median age
**Engineering**
- Design facilities that prioritize safety above all else
- Key Outcome: Reductions in severe and fatal collisions in High Injury Network (HIN)

**Enforcement**
- Encourage safe behaviors using evidence-based high visibility enforcement
- Key Outcome: Hours of dedicated enforcement for factors contributing to severe and fatal collisions

**Education**
- Engage the public to promote the importance of traffic laws and safe behaviors
- Key Outcome: Increased awareness of dangerous driving, biking, and walking behaviors

**Traffic Incident Management**
- Ensure that when a collision occurs, prompt care is provided
- Key Outcome: Maintain response times for traffic collisions with injuries based on dept. standards

**Law, Policy, and Advocacy**
- Improve the way traffic safety is managed by changing codes, laws, and policies that do not align with Vision Zero
- Key Outcome: Passage of significant laws and policies required to implement Vision Zero
2020 Projects in Greater Shady Grove
RECOMMENDED CIP BUDGET HIGHLIGHTS

$266.6 Million for Vision Zero related projects
- 26 pedestrian and bikeway projects
- Vision Zero incorporated into 16 road and bridge projects

$23.9 Million in additional funding
- $9.3 Million for Pedestrian Safety CIP
- $4.5 Million for Purple Line BiPPA
- $4.2 Million for filling in sidewalk gaps
- $2.0 Million for Amherst Ave. bikeway
- $1.9 Million for lighting along Seven Locks Rd Bikeway
- $1.3 Million for minor bikeway projects
- $0.7 Million for widening Good Hope Rd sidewalk project
Scheduled to be installed are:

**HAWK Beacons:**
- Muddy Branch & Muddy Branch Square Shopping Center

**Signal Timing Modifications:**
- Shady Grove Rd

**Complete Street Design:**
- Crabbs Branch Way
- Sam Eig Hwy
Scheduled to be installed are:

**Traffic Signal:**
- Wisteria Dr & Crystal Rock Dr
- MD 586 & Norris Dr (SHA)

**HAWK Beacons:**
- Willard Ave. & The Hills Plaza (Activation this winter)
- Democracy Blvd. & Walter Johnson HS
- Summit Ave & Brookfield Dr
- Bel Pre Rd (upgrade existing RRFBs)
- MD 586 & Andrew St (SHA)
- Muddy Branch & Muddy Branch Square Shopping Center

**Rectangular Rapid Flashing Beacons:**
- East West Highway & Edgevale St (SHA)
- Dale Drive & Dartmouth Ave
- West Cedar Lane & Cedarcrest
- Wisconsin Ave & Commerce Lane / Avondale Street
- Georgia Ave & Fenwick Lane

**Flashing Beacon:**
- MacArthur Blvd & Dunrobbin Dr
Scheduled for design and/or construction:
Complete Street Upgrades:
• Crabbs Branch Way
• Bel Pre Rd
• Middlebrook Rd

Signal Timing Modifications:
• Shady Grove Rd

Bicycle Facilities:
• Capital Crescent Surface Trail
• Woodmont Ave
• Marinelli Rd
• Aspen Hill Neighborhood Greenway
• Amherst Ave (in design)

Bus Stop Improvements:
• Randolph Rd

Trail Crossings:
• 15 additional upgrades
MCDOT and CountyStat developed an interactive project map to highlight Vision Zero related projects happening across the county.

Since the initial launch of the map, SHA projects have been included such as speed limit reductions on major highways and signal projects.

The map can be found on the Vision Zero homepage.
MCPD utilizes the Maryland Highway Safety Office’s high visibility enforcement (HVE) calendar to perform regular stepped up enforcement all year round. MCPD utilizes analyses from MHSO, Traffic Division data analyst, and CountyStat to identify hotspots for crashes.

Enforcement is typically tied with education to inform residents of the dangerous behaviors, ways to curb the behaviors, and explain why we perform high visibility enforcement.
### Dangerous Behavior

| Drivers not yielding to pedestrians at crosswalks | Targeted driver enforcement at crosswalks | 23% pedestrian crashes |
| Impaired driving | Publicized sobriety checkpoints | 17% alcohol related crashes |
| Driver excessive speeding | Automated speed enforcement | 19% reduction in severe collisions |

---

If all U.S. communities had speed-camera programs like the one IIHS studied in Maryland's Montgomery County, more than **21,000 fatal or incapacitating injuries would have been prevented** in 2013.
